Implementation Date: On or after March 14, 2019

Planned Network Change(s) will occur at specified locations in the following wire center area in Virginia. Exhibit A provides the list of addresses associated with the following wire center.

Wire Center	Address	CLLI
JEFFERSON ROAD	11 Wythe Creek Road, Hampton, VA 23666	NWNWVAJF

All of Verizon’s copper retirement notices may be viewed on Verizon’s website at <http://www.verizon.com/about/terms-conditions/network-disclosures>

Description of the planned network change(s):

Because of an instruction from the Department of Engineering for the City of Newport News, VA (“City”) that Verizon re-locate all of its facilities that may be in conflict with planned municipal modifications in the area of Campbell Road, Verizon must retire the copper facilities to approximately 155 addresses in the Jefferson Road, VA wire center area. Verizon has deployed or plans to deploy its fiber-to-the-premises network in these areas and intends to provide services over a fiber network infrastructure. Updating our network from copper to fiber benefits our customers because of fiber’s resiliency and reliability, especially in inclement weather. Fiber also provides our customers with expanded capabilities to grow with current bandwidth demands for their home or business.

Description of reasonably foreseeable impact(s) of the planned change(s):

After the retirement of the copper facilities, Verizon will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities. To help ensure an orderly transition, Verizon may require customers and interconnecting entities to migrate services off of copper facilities well before the copper retirement implementation date.
