Marlene H. Dortch  
Secretary  
Federal Communications Commission  
445 12<sup>th</sup> Street, SW  
Washington, DC 20554

**Re: Report Nos. NCD-1376, NCD-1391, and NCD-1398**

Dear Ms. Dortch:

In compliance with Section 51.329(b) of the Commission's rules, Verizon hereby amends certain Network Change Notifications ("Notifications") released for Public Notice by the Commission in 1) Report No. NCD-1376 on March 2, 2007, 2) Report No. NCD-1391 on March 29, 2007, and 3) Report No. NCD-1398 on April 6, 2007. The Notifications, related to network changes in Pennsylvania, inadvertently overstated the modifications to Verizon's network by indicating that Verizon currently intends to retire copper feeder facilities in the affected locations and replace those facilities with new fiber optic cable and digital loop carrier systems.

Instead, Verizon will install Digital Subscriber Line Access Multiplexer ("DSLAM") facilities in the affected remote terminals. After implementation, xDSL-compatible copper (metallic) loops leased by a wholesale carrier customer from Verizon and attached to a wholesale carrier customer's DSLAM collocated within the applicable Verizon Central Office potentially could encounter spectral interference as a result of the aforementioned network changes. Verizon has no current plans, however, to remove or retire the copper facilities at these feeder locations at this time. The affected central offices and remote terminals in Pennsylvania are listed in the Attachment accompanying this letter.

In accordance with 51.329(a), Verizon will provide public access to this letter on its Internet web site at "[http://www22.verizon.com/regulatory/reg\\_ntw\\_dscl.html](http://www22.verizon.com/regulatory/reg_ntw_dscl.html)". Please contact me should you need any further information.

Sincerely,

A handwritten signature in black ink that reads "Ann D. Berkowitz".
