**Description of the Planned Network Change(s):**

The Verizon Camp Hill PA 5ESS switch, located at 125 South 30th Street, Camp Hill, PA 17011, will be retired and removed from the network after all traffic served by this switch is migrated to the Verizon Harrisburg PA CS2K switch, located at 210 Pine Street, Harrisburg PA 17101. All traffic to be migrated includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC/IXC), wireless, and paging traffic.

**Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the Harrisburg PA CS2K switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the Camp Hill PA 5ESS switch will be required to reposition the codes to the Harrisburg PA CS2K switch.

All ASRs for the Harrisburg PA CS2K switch must be received no later than May 15, 2022 in order to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the Camp Hill PA 5ESS switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Camp Hill PA 5ESS switch (**on or after July 1, 2022**). This will serve to guide interconnect re-routes of traffic for the eleven (11) native codes currently served by the Camp Hill PA 5ESS switch to reflect the Harrisburg PA CS2K switch as the new home switch. All ASRs for the Harrisburg PA CS2K switch must carry the project code of **CPHLPACHDS0**.
