

6929 N. Lakewood Avenue
Tulsa, OK 74117

PUBLIC NOTICE OF NETWORK CHANGE UNDER RULE 51.329(a)

September 15, 2021

Carrier: Verizon Delaware LLC, 901 Tatnall Street, Wilmington, DE 19801

Contact: For additional information on these planned network changes, please contact:

Lisa Thompson
Global Data Network Engineering
Verizon Wireline Network Operations
13100 Columbia Pike, Floor 5 Room 505
Silver Spring, MD 20904
443-862-0212

John Dunne
Senior Manager – Global Data Network Engineering
Verizon Wireline Network Operations
2147 Route 27
Edison, NJ 08817
732-593-4003

Implementation Date: On or after September 1, 2022

Planned Network Change(s) will occur at the following locations in Delaware:

Verizon Central Office	Address	CLLI
Newark DE DMS100 Switch	1 Washington Street Newark, DE 19711	NWRKDENBDS0
Wilmington DE CS2K Switch	901 North Tatnall Street Wilmington, DE 19801	WLMGDEWLPS1

This notice may also be viewed at <http://www.verizon.com/about/terms-conditions/network-disclosures>

PLEASE NOTE:

- All references to the Newark DE DMS100 switch are associated with CLI code NWRKDENBDS0 and will not be repeated throughout this notice.
- All references to the Wilmington DE CS2K switch are associated with CLI code WLMGDEWLPS1 and will not be repeated throughout this notice.

Description of the Planned Network Change(s):

The Verizon Newark DE DMS100 switch, located at 1 Washington Street, Newark, DE 19714, will be retired and removed from the network after all traffic served by this switch is migrated to the Verizon Wilmington DE CS2K switch, located at 901 North Tatnall Street, Wilmington, DE 19801. All traffic to be migrated includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC/IXC), wireless traffic and paging traffic.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers and paging carriers will need to secure new trunk groups built to the Wilmington DE CS2K switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the Newark DE DMS100 switch will be required to reposition the codes to the Wilmington DE CS2K switch.

All ASRs for the Wilmington DE CS2K switch must be received no later than July 27, 2022 in order to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the Newark DE DMS100 switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Newark DE DMS100 switch (**on or after September 1, 2022**). This will serve to guide interconnect re-routes of traffic for the twenty-six (26) native codes currently served by the Newark DE DMS100 switch to reflect the Wilmington DE CS2K switch as the new home switch. All ASRs for the Wilmington DE CS2K switch must carry the project code of **NWRKDENBDS0**.
