**Description of the Planned Network Change(s):**

The Verizon Boonton NJ 5ESS switch, located at 205 Lathrop Avenue, Boonton, NJ 07005, will be retired and removed from the network after all traffic served by this switch is migrated to the Verizon New Brunswick NJ C20 switch, located at 18 Paterson Street, New Brunswick, NJ 08901. All traffic to be migrated includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC/IXC), wireless, and paging traffic.

**Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the New Brunswick NJ C20 switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the Boonton NJ 5ESS switch will be required to reposition the codes to the New Brunswick NJ C20 switch.

All ASRs for the New Brunswick NJ C20 switch must be received no later than May 23, 2025, to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the Boonton NJ 5ESS switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Boonton NJ 5ESS switch (**on or after July 2, 2025**). This will serve to guide interconnect re-routes of traffic for the eleven (11) native codes currently served by the Boonton NJ 5ESS switch to reflect the New Brunswick NJ C20 switch as the new home switch.
