**Description of the planned network change(s):**

As part of a highway improvement project for the Route 1 and Route 123 interchange area in Occoquan, VA, the Virginia Department of Transportation is requesting Verizon relocate the impacted facilities. Verizon has deployed its fiber-to-the-home network in the areas identified in these locations. Verizon therefore intends to retire a number of copper facilities in the Occoquan, VA wire center serving locations listed in the attached Exhibit A and provide services over the fiber network infrastructure.

**Description of reasonably foreseeable impact(s) of the planned change(s):**

After the retirement of the copper facilities, Verizon will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities.

**Description of any changes in prices, terms or conditions that will accompany the planned change(s):**

As a general matter, this retirement of copper facilities will not result in changes to rates, terms or conditions in cases where the affected service is converted to a like-for-like service that is available on fiber facilities. Interconnecting entities, however, should review the applicable tariff or agreement for certain terms that may apply specifically in cases where the service is provisioned on fiber. In cases where interconnecting entities elect to replace the affected service with an alternative service that Verizon offers on fiber facilities, the rates, terms, and conditions will be as set forth in the tariff or agreement under which Verizon offers the replacement service that the interconnecting entity selects.

**Addresses Removed from Exhibit A as filed on September 1, 2016**
