John Dunne  
Senior Manager – Global Data Network Engineering  
Verizon Wireline Network Operations  
2147 Route 27  
Edison, NJ 08817  
732-593-4003

**Implementation Date:** On or after **February 1, 2022**

**Planned Network Change(s) will occur at the following locations in Pennsylvania:**

Verizon Central Office	Address	CLLI
Uniontown PA VTOA Gateway switch	23-29 W. Church Street Uniontown, PA 15401	UNTNPAUNG0
Pittsburgh PA Downtown 71T Tandem switch	416 7th Avenue Pittsburgh, PA 15219	PITBPADT71T

This notice may also be viewed at <http://www.verizon.com/about/terms-conditions/network-disclosures>

PLEASE NOTE:

- All references to the Uniontown PA VTOA Gateway switch are associated with CLLI code UNTNPAUNG0 and will not be repeated throughout this notice.

- All references to the Pittsburgh PA Downtown 71T DMS200 Tandem switch are associated with CLLI code PITBPADT71T and will not be repeated throughout this notice.

**Description of the Planned Network Change(s):**

The Verizon Uniontown PA VTOA Gateway switch, located at 23-29 West Church Street, Uniontown, PA 15401, will be retired and removed from the network after all traffic served by this switch is migrated to the Verizon Pittsburgh PA Downtown 71T DMS200 Tandem switch, located at 416 7th Avenue, Pittsburgh, PA 15219. All traffic to be migrated includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC/IXC), wireless, and paging traffic.

**Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the Pittsburgh PA Downtown 71T DMS200 Tandem switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the Uniontown PA VTOA Gateway switch will be required to reposition the codes to the Pittsburgh PA Downtown 71T DMS200 Tandem switch.

All ASRs for the Pittsburgh PA Downtown 71T DMS200 Tandem switch must be received no later than December 21, 2021 in order to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the Uniontown PA VTOA Gateway switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Uniontown PA VTOA Gateway switch (**on or after February 1, 2022**). This will serve to guide interconnect re-routes of traffic for the eight (8) end offices currently served by the switch to reflect the Pittsburgh PA Downtown 71T DMS200 Tandem switch as the new home switch. All ASRs for the Pittsburgh PA Downtown 71T DMS200 Tandem switch must carry the project code of **UNTNPANGT0**.
