Tucson Unified School District Joins Verizon Innovative Learning Program to Bring 24/7 Internet Access, Tablets and Technology Coaches to Local Middle Schools

In partnership with Digital Promise, Verizon Innovative Learning will welcome three schools in the Tucson Unified School District for the 2019-20 school year

TUCSON, Ariz. – Today Tucson Unified School District joins [Verizon Innovative Learning](#), the education initiative of the Verizon Foundation. In partnership with Digital Promise, Verizon Innovative Learning equips every student and teacher at select middle schools across America with a device and up to a four-year data plan. In addition to free technology and access, schools receive extensive teacher training and support, along with the opportunity to engage in powerful teaching and learning that leverages technology in and out of the classroom.

The program, which launched in partnership with Digital Promise in 2012, has reached more than 86,000 students and nearly 6,000 teachers across 100 middle schools to date. At the start of the 2019 school year, **Lawrence 3-8 School, Mansfeld Middle Magnet School** and Pueblo Gardens PK-8 are among the 50 new schools joining Verizon Innovative Learning, bringing the program to 150 middle schools nationwide.

In addition to free mobile devices and accompanying 4G LTE data plans, participating schools will be assigned a full-time technology coach from Digital Promise to train teachers in effectively integrating technology into their lessons. Over the course of the initiative, Verizon Innovative Learning will also provide the opportunity for students to leverage emerging technology such as augmented & virtual reality, artificial intelligence and 3D design and internet of things.

“We are very excited to partner with Verizon to implement this new technology to deliver excellence in education each and every day,” said Dr. Gabriel Trujillo, Tucson Unified School

District Superintendent. “Decreasing the divide between students and teachers will create a collaborative environment that will equip our students to succeed within all levels of their education.”

Students are seeing marked academic improvement as a result of the initiative.* To date, Verizon has invested \$400 million in education efforts, has impacted one million students and will reach two million more by 2021.

Verizon will be the first to bring 5G technology to the classroom in the third quarter of 2019. This commitment will help provide underserved middle school students with the skills needed to put them on the path to success in an increasingly technology-dependent economy.

###

* 53% are more engaged in school. Across all VIL programs that reported data in 2017.

After two years, VILS students improved on standardized tests at rates higher than their peers - 3X for math and 2X for reading.

About Verizon Innovative Learning

Verizon Innovative Learning, the education initiative of the Verizon Foundation, brings technology and hands-on learning opportunities to middle and high school students in underserved schools and communities. We not only fund the programs, but we also create and administer them in partnership with leading nonprofits. We diligently measure the impact of our work and refine our programs to ensure we’re making a difference. We’ve reached more than 1 million students so far – and we’re just getting started.
