Subject : Verizon Partner Solutions Industry Letter: Bethesda, MD DMS 08T Tandem Switch Retirement

PLEASE NOTE:
- All references to the Bethesda MD DMS 08T tandem switch are associated with CLLI code CHCHMDBE08T and will not be repeated throughout this letter.
- All references to the Southwest DC DMS C20 G0T tandem switch are associated with CLLI code WASHDCSWG0T and will not be repeated throughout this letter.

As set out in the Verizon Maryland LLC Public Notice of Network Change under Rule 51.329(a), dated April 12, 2023, on or after October 16, 2023, the Bethesda MD DMS 08T tandem switch will be retired and removed from the Verizon network as part of a modernization effort.

General Information: The Bethesda MD DMS 08T tandem switch will be replaced by the Southwest DC DMS C20 G0T tandem switch. See details in Table A.

The Exchange codes (NXXs) in Numbering Plan Areas (NPAs) 240, 301, 410, 443 and 667 subtending to the forty-four (44) end offices supporting Local/Intra-LATA traffic will be moved to the Southwest DC DMS C20 G0T tandem switch (see Table B below). The NPAs NXXs currently residing in the Bethesda MD DMS 08T tandem switch will be rehomed upon decommissioning of the switch and reflected in the Local Exchange Routing Guide (LERG) for the Southwest DC DMS C20 G0T tandem switch. This will occur on or after October 16, 2023.

Network Changes and Trunk Rearrangements:

The Southwest DC DMS C20 G0T tandem switch will be the recipient office of traffic migrated from the Bethesda MD DMS 08T tandem switch. Traffic to be migrated to the Southwest DC DMS C20 G0T tandem switch includes all of the traffic currently handled by the Bethesda MD DMS 08T tandem switch including, but not limited to, inter-LATA access traffic (including Feature Groups B and D traffic), intraLATA and local traffic (including CLEC, IEC, wireless and paging). After all traffic is migrated off of the Bethesda MD DMS 08T tandem switch, this switch will be retired and removed from the network.

All CLECs, IXCs, IECs, ILEC, wireless carriers and paging carriers will need to provision new trunk groups to the Southwest DC DMS C20 G0T tandem switch to replace existing trunk groups in the Bethesda MD DMS 08T tandem switch.

All ASRs for the Southwest DC DMS C20 G0T tandem switch must be received no later than **August 29, 2023** to provide sufficient time to migrate the traffic described above. All traffic must be moved on or after **October 16, 2023** based on LERG change notification. ASRs for the Southwest DC DMS C20 G0T tandem switch must carry the project code of **CHCHMDBE08T**.

Upon decommissioning of the Bethesda MD DMS 08T tandem switch, the forty-four (44) offices that subtend the Bethesda MD DMS 08T tandem switch will reflect the Southwest DC DMS C20 G0T tandem switch in the LERG.

Submission of disconnect ASRs to Verizon for the Bethesda MD DMS 08T tandem switch are required immediately after the re-homing of traffic is complete.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Bethesda MD DMS 08T tandem switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
