**Network Changes and Trunk Rearrangements:**

The Pearl Street NY C20 switch will be the recipient office of traffic migrated from the Tratman Avenue NY 5E switch. Traffic bound for the codes listed in Table B will be delivered via the 37 St NY 23T 5E tandem local and LD FG (NYCMNY3723T intra-lata SHA / inter-lata FG Access SHA).

After all traffic is migrated off the Tratman Avenue NY 5E switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Pearl Street NY C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Tratman Avenue NY 5E switch will be required to reposition the codes to the Pearl Street NY C20 switch.

All ASRs for the Pearl Street NY C20 switch must be received no later than November 1, 2024, to provide sufficient time to migrate the traffic described above. All traffic must be moved by January 2, 2025. All ASRs for the Pearl Street NY C20 switch must carry the project code of NYCMNY18DS2.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Tratman Avenue NY 5E switch.
