### Network Changes and Trunk Rearrangements:

The Providence, RI C20 switch will be the recipient office of traffic migrated from the Centredale, RI DMS100 switch. Traffic bound for the codes listed in Table B will be delivered via the Providence, RI Tandem (PRVDRIWA06T intra-lata SHA / PRVDRIWA06T inter-lata FG Access SHA).

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Providence, RI C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Centredale, RI DMS100 switch will be required to reposition the codes to the Providence, RI C20 switch.

All ASRs for the Providence, RI C20 switch must be received no later than November 15, 2024, to provide sufficient time to migrate the traffic described above. All traffic must be moved by January 2, 2025. All ASRs for the Providence, RI C20 switch must carry the project code of **NPRVRIMSDS1**.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Centredale, RI DMS100 switch.
