Subject : Verizon Partner Solutions Industry Letter: Landover MD 5ESS Switch Retirement

PLEASE NOTE:

- All references to the Landover MD 5ESS switch are associated with CLLI code LDVRMDLDDS0 and will not be repeated throughout this letter.
- All references to the Hyattsville MD CS2K switch are associated with CLLI code HYVLM DHYPS0 and will not be repeated throughout this letter.

As set out in the Verizon Maryland LLC Public Notice of Network Change Under Rule 51.329(a), dated August 30, 2024, on or after March 1, 2025, the Landover MD 5ESS switch will be retired and removed from the Verizon network.

General Information: The Landover MD 5ESS switch will be replaced by the Hyattsville MD CS2K switch. See details in Table A.

The Exchange Codes (NXXs) in Numbering Plan Area (NPA) 301 currently residing in the Landover MD 5ESS switch will be rehomed upon decommissioning of the switch and reflected in the Local Exchange Routing Guide (LERG) on or after March 1, 2025. See details in Table B.

Network Changes and Trunk Rearrangements:

The Hyattsville MD CS2K switch will be the recipient office of traffic migrated from the Landover MD 5ESS switch. Traffic to be migrated to the Hyattsville MD CS2K switch includes all of the traffic currently handled by the Landover MD 5ESS switch including, but not limited to, Inter-LATA access traffic (including Feature Group B and D traffic), and Intra-LATA and local traffic (including CLEC, IEC, wireless and Verizon sector end office switched traffic). After all traffic is migrated off of the Landover MD 5ESS switch, this switch will be retired and removed from the network.

All CLECs, IXCs, IECs, ILEC, wireless carriers and paging carriers will need to provision new trunk groups to support direct end office trunking to the Hyattsville MD CS2K switch. Carriers with existing trunk groups to this switch will need to augment if necessary.

All ASRs for the Hyattsville MD CS2K switch must be received no later than **November 19, 2024**, to provide sufficient time to migrate the traffic described above. All traffic must be moved on or after **March 1, 2025**, based on LERG change notification. ASRs for the Hyattsville MD CS2K switch must carry the project code of **LDVRMDLDDS0**.

Upon decommissioning of the Landover MD 5ESS switch, the twelve (12) native codes (NPA NXXs) that currently reside in **the** Landover MD 5ESS switch will reflect the Hyattsville MD CS2K switch in the LERG.

Submission of disconnect ASRs to Verizon for the Landover MD 5ESS switch are required immediately after the re-homing of traffic is complete.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Landover MD 5ESS switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
