## Subject : Verizon Partner Solutions Industry Letter: Reisterstown MD DMS100 Switch Retirement

**PLEASE NOTE:**

- All references to the Reisterstown MD DMS100 switch are associated with CLLI code RSTWMDRSDS0 and will not be repeated throughout this letter.
- All references to the Annapolis MD C20 switch are associated with CLLI code ANNPMDANPS1 and will not be repeated throughout this letter.

As set out in the Verizon Maryland LLC Short Term Public Notice Under Rule 51.333(a), dated September 23, 2024, on or after February 1, 2025, the Reisterstown MD DMS100 switch will be retired and removed from the Verizon network.

**General Information:** The Reisterstown MD DMS100 switch will be replaced by the Annapolis MD C20 switch. See details in Table A.

The Exchange Codes (NXXs) in Numbering Plan Area (NPA) 410 currently residing in the Reisterstown MD DMS100 switch will be rehomed upon decommissioning of the switch and reflected in the Local Exchange Routing Guide (LERG) on or after February 1, 2025. See details in Table B.

**Table A**

Description	From	To
Office Name	Reisterstown	Annapolis
CLLI Code	RSTWMDRSDS0	ANNPMDANPS1
Switch Type	DMS100	C20
Location	45 Westminster Road Reisterstown, MD 21136	9 Northwest Street Annapolis, MD 21401
Point Code	246 192 025	246 192 059
NXX Type	EOC	EOC
OCN	9212	9212
Rate Center LATA	238	238
Rate Center	REISTERSTOWN	ANNAPOLIS
State	MD	MD

**Table B**

NPA	NXX	TYPE	RATECENTER
410	429	EOC	REISTERSTOWN
410	517	EOC	REISTERSTOWN
410	526	EOC	REISTERSTOWN
410	833	EOC	REISTERSTOWN
410	861	EOC	REISTERSTOWN

**Network Changes and Trunk Rearrangements:**

The Annapolis MD C20 switch will be the recipient office of traffic migrated from the Reisterstown MD DMS100 switch. Traffic to be migrated to the Annapolis MD C20 switch includes all of the traffic currently handled by the Reisterstown MD DMS100 switch including, but not limited to, Inter-LATA access traffic (including Feature Group B and D traffic), and Intra-LATA and local traffic (including CLEC, IEC, wireless and Verizon sector end office switched traffic). After all traffic is migrated off of the Reisterstown MD DMS100 switch, this switch will be retired and removed from the network.

All CLECs, IXCs, IECs, ILEC, wireless carriers and paging carriers will need to provision new trunk groups to support direct

end office trunking to the Annapolis MD C20 switch. Carriers with existing trunk groups to this switch will need to augment if necessary.

All ASRs for the Annapolis MD C20 switch must be received no later than **November 19, 2024**, to provide sufficient time to migrate the traffic described above. All traffic must be moved on or after **February 1, 2025**, based on LERG change notification. ASRs for the Annapolis MD C20 switch must carry the project code of **RSTWMDRSDS0**.

Upon decommissioning of the Reisterstown MD DMS100 switch, the five (5) native codes (NPA NXXs) that currently reside in **the** Reisterstown MD DMS100 switch will reflect the Annapolis MD C20 switch in the LERG.

Submission of disconnect ASRs to Verizon for the Reisterstown MD DMS100 switch are required immediately after the re-homing of traffic is complete.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Reisterstown MD DMS100 switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
