PLEASE NOTE:

- All references to the Clarksville MD DMS switch are associated with CLI code CLVLMDCEDS0 and will not be repeated throughout the notice.
- All references to the Annapolis MD C20 switch are associated with CLI code ANNPMDANPS1 and will not be repeated throughout the notice.

Description of the Planned Network Change(s):

The Verizon Clarksville MD DMS switch, located at 12201 Route 108, Clarkesville, MD 21029 will be retired and removed from the Verizon network after all traffic served by this switch is migrated to the Annapolis MD C20 switch, located at 9 Northwest Street, Annapolis, MD 21401. All traffic to be migrated to the Annapolis MD C20 switch includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC IXC), wireless and paging traffic.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

All carriers, including competitive local exchange carriers (CLECs), Interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to provision new trunk groups to support direct end office trunking to the Annapolis MD C20 switch or have existing trunk groups to that switch augmented.

All ASRs for the Annapolis MD C20 must be received no later than **August 21, 2023** to provide sufficient time to migrate the traffic described above. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Clarksville MD DMS switch (**on or after October 2, 2023**). This will serve to guide interconnect re-routes of traffic for the NPA codes currently served by the Clarksville MD DMS switch to reflect the Annapolis MD C20 as the new home switch. All trunks to the Annapolis MD C20 switch must be in place prior to the decommissioning of the Clarksville MD DMS switch. All ASRs for the Annapolis MD C20 switch must carry a project code of **CLVLMDCERP0**.
