Notes: Current coverage details and additional plan information can be found at www.verizonwireless.com. Coverage includes the Verizon Wireless 5G Ultra Wideband (UWB) network, 5G Nationwide® network, and 4G LTE network. For avoidance of doubt, the Verizon Wireless 5G Nationwide network is a separate network from the Verizon Wireless 5G Ultra Wideband network. Usage outside of the United States will be billed at the international travel feature rate, if applicable, or pay as you go pricing, which can be found at www.verizonwireless.com/international. Lines activating on this plan must be on 5G or 4G LTE tablets.

¹If 10 GB of domestic data usage is exceeded on any line in any given billing cycle, Verizon Wireless will limit the data throughput speeds to up to 600 Kbps in 4G LTE network service areas and up to 3 Mbps in 5G UWB network service areas for additional usage for the remainder of the then-current billing cycle for the line that exceeds the data usage.

²Data can be used in 4G LTE, 5G Nationwide, or 5G UWB network service areas. A 5G device is required to receive 5G UWB service. Video applications will stream in up to 4K when in 5G UWB network service areas. Network default and capability of the device will determine video streaming in 4G LTE and 5G Nationwide network service areas.

A brief service outage and device reboot may be required in order for this plan to take effect on existing 5G UWB lines.
