

Verizon Partner Solutions Exchange

May 2024 Release Upgrade

The next release upgrade of the Verizon Partner Solutions Exchange platform is on Sunday, May 19, 2024, including the following capabilities.

Products

- **DDoS Shield with Internet Dedicated+**
Offer "DDoS Shield" as an additional feature to select for Internet Dedicated+. (DDoS=Distributed Denial-of-Service)
- **Dedicated E-Line**
Re-establish the online price quoting and ordering process to replace the generic request flow.
- **Metro/National Wavelength (Optimized Service)**
Re-establish the online price quoting and ordering process to replace the generic request flow. For the 100G speed, the process is modified to indicate pricing has to be requested from the account team
- **Data Center Connectivity Solution**
Introduce shop by solution to simplify the quoting and ordering process for third-party data center interconnectivity to meet your business needs. The solution offers Metro/National Wavelength Optimized Service between a customer location and a data center or between two data centers, with options that deliver a third-party cross-connect or campus cross-connect in data center colocation facilities.

Quoting & Ordering

- **Metro Wavelength (Non-Optimized)**
Improve the process to provide pricing online for certain configurations or to request pricing from the account team.
- **Fiber to the Internet (FTTI) Jeopardy Reason in Remarks**
Show the reason for the jeopardy so customers do not have to contact the ordering center to request this information.
