

Verizon Partner Solutions Exchange

We're pleased to announce exciting changes coming to the Verizon Partner Solutions Exchange. This upgrade will take effect on November 20, 2022.

Release Highlights

Products

- **Broadband Fiber to the Internet (FTTI) 2G speed** available for ordering
- **Wave Solutions: Wave Mesh Restoration** can be ordered with unprotected 10G National WAVE
- **Software Defined Interconnect** available to quote and order

Network Inquiry (Beta Release)

- **Request and download network maps (KMZ format)** for as-provisioned service, quoted route design for Wave service, and fiber availability. Customers approved to view maps will have this capability.

Ordering

- **Search for historical orders** that were completed or cancelled in the former Order by Product (OBP) and National Order By Product (NOBP) systems.

Change Service

- **Project field** on change and disconnect orders to identify the project with which the order is associated.
- **Move & change for products:** Private Line (USPL, MPL), Dedicated Access Line and non-optimized Private IP (PIP).

Repair

- **Improved validation** of all circuit IDs entered during the creation of a multi-circuit ticket which is available for selected service types.
- **Additional email address** can be provided on the user profile for repair notifications
- **Redesign the comments section** for better access to view and edit during the repair process

B2B: Application Programming Interface (API) Capabilities

- **Compliant with MEF LSO Sonata Framework Release Dolly** for ordering Ethernet Switched E-Line
- **Broadband Fiber to the Internet (FTTI)** service qualification API for all speeds (Dec 2022)
