²If the combined 4G and 5G data usage exceeds 35 GB of domestic data usage on any line in any given billing cycle, usage may be prioritized behind other customers in the event of 4G LTE and 5G Nationwide network area congestion. To ensure users are able to maximize their high-speed data use for business applications, video applications will stream at up to 1080p while in 4G LTE and 5G Nationwide network service areas, and will apply video streaming up to 4K while in 5G UWB network service areas.

³Mobile hotspot is available on all capable devices and allows the line to share its data allowance with multiple Wi-Fi enabled devices. If the combined 4G and 5G mobile hotspot data usage exceeds 15 GB on any line in any given billing cycle, Verizon Wireless will limit the data throughput speeds to up to 600 Kbps for additional usage while in 4G LTE and 5G Nationwide network service areas, and will apply up to 3 Mbps when in 5G UWB network service areas for the remainder of the then-current billing cycle for the line that exceeds the data usage.

Plan #	70996

Notes: Current coverage details and additional plan information can be found at www.verizonwireless.com. Coverage includes the Verizon Wireless 5G Nationwide® network, 5G Ultra Wideband (UWB) network, and 4G LTE network. For avoidance of doubt, the Verizon Wireless 5G Nationwide network is a separate network from the Verizon Wireless 5G Ultra Wideband network. ²Data usage on this plan is not subject to speed reductions (“throttling”) within a given billing cycle. However, in the event data usage exceeds 50GB each billing cycle for three (3) consecutive billing cycles, data throughput speeds will automatically be reduced for data usage exceeding 50GB per billing cycle on a go-forward basis. Data usage for actively engaged and deployed fire, police, emergency medical technicians, emergency management agency, and assigned federal law enforcement users on this plan will not be subject to speed reductions regardless of data usage during any billing cycle. To ensure users are able to maximize their high-speed data use for business applications, video applications will stream at 720p.

This plan includes Mobile Broadband Priority and Preemption services, which are available while on the domestic 4G LTE network. Mobile Broadband Priority allows customers to connect to the network with priority by leveraging a pool of radio resources dedicated to enable their connection. Mobile Broadband Priority identifies the user with an Access Priority setting, giving them higher priority for network access than lower Access Class users. Preemption automatically activates to provide approved personnel uninterrupted access to the network in those uncommon times when the network is fully utilized. 911 calls are never preempted. Devices utilized in conjunction with this plan are limited to mobile device applications. Dedicated internet connections (including but not limited to, stationary wireless networking router devices), streaming video on non-smartphone devices (including but not limited to body cameras and stationary video surveillance cameras), and IoT devices are expressly prohibited on this plan.
