

Inventory Decom Program Network Management

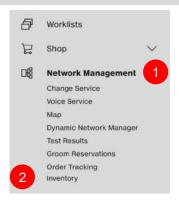

Things to Know

- 1. Inventory availability is based on user roles (must have Quote and Order access).
- 2. Max inventory display is 2K, if max is exceeded a file will be provided.
- 3. Users will receive an email when a new Notification is sent, or comments are added.

Getting Started

From the Hamburger menu,

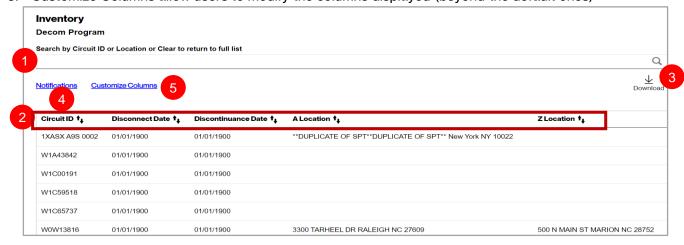

- Choose Network Management
- 2. Click on Inventory

Search Inventory

Inventory Homepage search and sort functions

- Search by Circuit ID or Location
 - · Search by location will display "A" and/or "Z" location results
- 2. Arrange worklist columns by using the sort 1 function
- 3. Download all inventory items into a csv file
- 4. Click Notifications to view Notifications Worklist
- 5. Customize Columns allow users to modify the columns displayed (beyond the default ones)

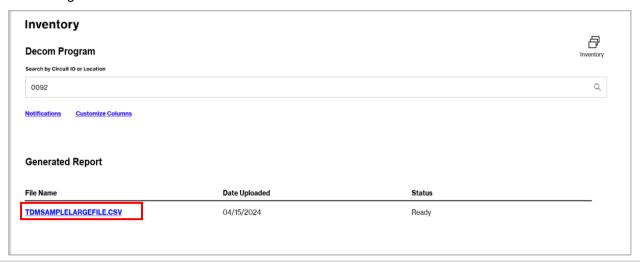

Inventory Decom Program Network Management

Search Inventory continued

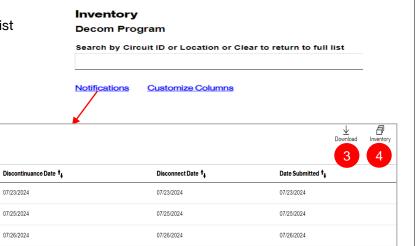

If results exceed the maximum allowance (2,000), users will receive a "File is in process message."

- · An email will be sent when the CSV file is generated
- · Click File Name to access/download file
- File will be available to download for 48 hours. A new file will generate after 48 hours when Inventory is accessed again
