

## Fact sheet

# Enjoy a reliable way to connect.

## Verizon Internet Dedicated Services

### Connect quickly and do business sooner.

Internet Dedicated with Express Connect combines the high performance and reliability of dedicated internet with 4G LTE wireless access. That means you get quick service delivery within about eight business days and business continuity features. Wireless access gives your critical applications 4G LTE connectivity during your wired installation. Once your high-speed bandwidth wired service is up and running, your 4G LTE wireless access becomes a reliable backup connection.

### Secure your assets.

With Internet Dedicated with Secure Connect, you get an all-in-one security appliance that acts as a router with speeds up to 50 Mbps. It includes a next-generation firewall with built-in intrusion protection, content filtering and anti-virus. You also have access to our management portal, user analytics, ongoing monitoring, maintenance and technical support.

### Why Verizon

We support your global business with one of the world's largest, seamlessly connected global IP networks. Our reliable and competitive SLAs include 24-hour customer service and advanced reporting features.

### Learn more.

For information on how the suite of Internet Dedicated Services solutions can help you grow your business and drive better business results, contact a sales representative at 800.201.1452 or visit:

Your business depends on the internet. Whether it's to drive mission-critical applications, keep communications open or just ensure everyday access, you need a fast and reliable connection. With high-bandwidth access up to 10 Gbps, we offer dedicated internet with a range of IP options your business needs.

**Our full suite of solutions offers your business high performance, better scalability, strong protection and fast business ramp-up with business continuity features.**

### Make your business better.

You can drive better business performance with our high-speed, enterprise-grade network connection. You can scale your speed and bandwidth up or down as needed to meet changes in your business. You can choose quality-of-service (QoS) options to give your key business applications and network traffic the priority they need.

Our flexible pricing lets you easily adapt to changes in your usage patterns. You can choose Burstable Select for full potential bandwidth with ongoing monthly use. Or you can go with flat monthly pricing based on bandwidth tiers.

Verizon Internet Dedicated Services also offers the following powerful features and options.

- Moderate to high bandwidth, speeds from 1 Mbps up to 10,000 Mbps/10 Gbps (speeds vary by location)
- Network redundancy and/or diversity features
- Time-division multiplexing
- (TDM) or Ethernet
- Private IP services
- Leased-line access from T1/NxT1/E1 to Nx10GB
- Extensive service level agreements (SLAs), including 100 percent network availability and 15-minute denial-of-service (DoS) defense response (U.S.)<sup>1</sup>
- World-class Network Operations Centers (NOCs) and 24x7 support
- Support for IPv4 and/or IPv6 protocols
- 24x7 proactive monitoring
- Powerful management tools
