

The ultimate in mobile internet security—simplified

Verizon Business Mobile Internet Security

You don't need to be an IT expert to start protecting your business from compromised data, potential financial loss and reputational damage.

Zero-touch security solution

No installation required. Once your order is complete, your mobile internet protection starts as soon as your smartphone connects to the Verizon mobile network. Enjoy the peace of mind that comes with zero-touch security.

Device agnostic

If your employees use different mobile phones and plans, no problem – the solution works across most smartphones and business mobile plans.

Security capabilities

Get ransomware protection, block malicious websites and files, and protect against the latest internet threats such as trojans, adware, viruses, bots, and phishing – all with a single solution.

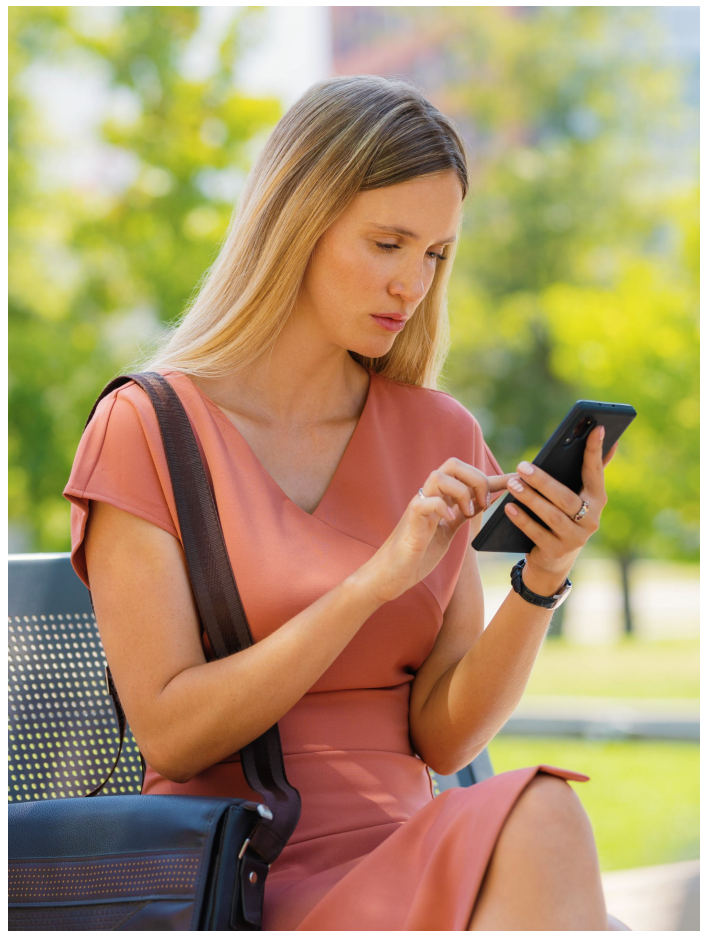

Simplified investment

Get robust mobile internet security with no upfront costs and the flexibility to cancel any time.

Take steps to boost your organization's mobile internet security at an affordable, budget-friendly price.

\$2/month
