

Connected laptops use cases: Public safety, government

Public safety and government employees can still be productive—even when they work out of the office.

Collaboration

Collaborate easily with other workers through file sharing, document editing and videoconferencing capabilities. Work quality can improve, and employees can save time by quickly connecting with coworkers as needed.

Access to information

With secure connectivity to keep students engaged and connected inside and outside of the classroom, connected can help close the digital divide.

Productivity

Office-based workers can be more productive when provided with the tools they need to complete their tasks. This can include word processing software, spreadsheets, presentation software and web browsers.

Communication

Just because an employee isn't on the job site doesn't mean communication has to stop. Connected laptops support collaboration and productivity through email, instant messaging and videoconferencing.

Training

Access to training courses for office-based workers can help them learn new skills and stay up to date on the latest technologies.

Even on the go, employees can still get the job done.
