# Use Cisco Jabber on Apple Watch

Release: 12.5

Use Apple Watch to collaborate with your coworkers from anywhere, when you don't have your mobile phone within your reach. You can set your Jabber availability status **and make sure people know when you're reachable. You can also send messages as** well as make and receive calls.

| Icon | Description |
|------|-------------|
| 1 | View and change availability status. |
| 2 | View missed calls and call contacts in the Recents list. |
| 3 | View received messages and respond to them using canned messages, emoticons, or Siri. |
