Setup Guide

More advanced setup options.

For advanced router settings and options, see the Quick Start guide at setup.verizon.com/internetgatewaybusiness

To access these settings from your browser, enter the Network Settings URL and Network Settings Password located on the back of the Verizon Business Internet Gateway.

Need help?

For assistance, call **800.922.0204** and enter the Verizon wireless number associated with your Internet Gateway. This number is the Mobile Number from your order confirmation email or packaging slip.

Let's get started.

Verizon Business Internet Gateway

Scan the QR code for step-by-step setup instructions, or go to setup.verizon.com/internetgatewaybusiness

1 Attach the paddle antennas.

Connect the four paddle antennas to the ports at the back of the Gateway, starting with antenna ports 1 and 2. Ensure the antennas are securely screwed in for optimal performance as illustrated below.

2 Pick a location.

Place your Gateway in an open area on an elevated surface near a window.

3 Plug in the Gateway.

Connect the power cord to the  port and plug the other end into an outlet.

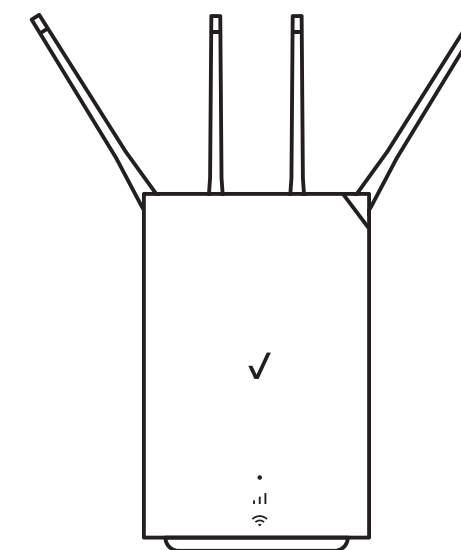

4 Wait for it to start up.

Look for the indicator lights on the front of the Gateway. When all three indicator lights are solid white, you are connected. This may take up to 15 minutes while the lights flash white or red.

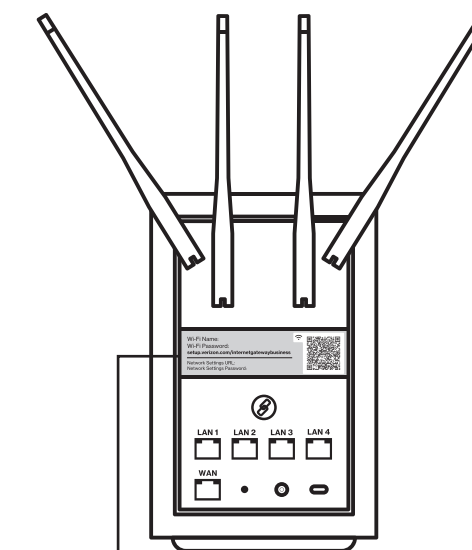

5 Connect to the Gateway.

Connect your devices using the QR code or the **Wi-Fi Name** and **Wi-Fi Password** (case sensitive) on the **back of the Gateway**.
