Before you begin

This guide provides information you need to quickly use your new phone.

Make sure you place the phone on a location with strong 4G signal to ascertain the proper activation and functioning of the device. The phone can only be fully activated over LTE. If the phone does not properly go through the eSIM provisioning the first time, if you were to set it up to LAN mode, the phone will be unable to register.

Examples and graphics in this guide may not directly reflect what is displayed or is available on your phone screen since firmware updates occur and may change the user interface of the phone.

Getting started

Before you use your phone, take some time to get familiar with its features and user interface.

The terms "the phone" and "your phone" refer to the LTE Desk phone.

T64LTE hardware

Understanding the phone hardware helps you easily use the phone's features.

No.	Item	Description
1	Volume Key	Adjust the volume of the handset, the speakerphone, the earphone, the ringer, or the media.
2	Redial Key	Opens the call history logs to redial the last number

3	Speaker	Provide audio output during hands-free.
4	Keypad	Enable you to enter numbers, letters, and special characters.
5	Speakerphone	Toggle the speakerphone (hands-free) mode or not. The LED indicator glows green when the speakerphone is activated.
6	Mute Key	Toggle the microphone on or off. The LED indicator glows red when the mute feature is activated.
7	Headset Key	Toggle the headset on or off. The LED indicator glows green when the headset is activated.
8	Touch Screen	4 inches (480 x 800) capacitive touch screen, tap to select items and navigate menus.
9	Power LED Indicator	Indicate phone statuses: When receiving an incoming call, it fast flashes. When receiving a voice message, it slowly flashes.
10	USB2.0 port (5V/0.5 A)	Allow you to connect USB devices.

Power LED indicator

The power LED indicator indicates the call and message status.

Led status	Description
Solid red	The phone is initializing.
Fast-flashing red (0.3s)	The phone is ringing.
Slowly-flashing red (1s)	The phone has received a voice mail.
Solid red for 0.5s and off for 3s alternately	The phone is entering the power-saving mode.

Screen and icons

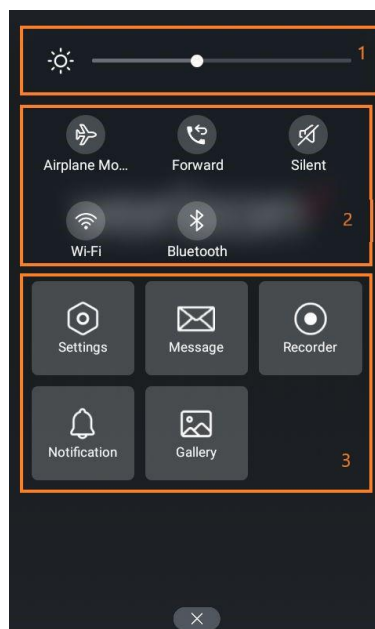

The user screens and icon indicators can help you navigate and understand the important information on the phone's status.

Control center and notification center

Control center or notification center allows you to access some features or view important notifications quickly.

Procedure

1. Swipe down from the top of the screen.

No.	Name	Description
1	Screen brightness	Drag the slider to adjust the screen brightness.
2	Call Center	<ul style="list-style-type: none"> • Airplane Mode: Tap to turn on/off airplane mode. • Forward: Tap to enter Call Forward setting screen. • Silent: Tap to turn on/off Silent quickly. • Wi-Fi • Tap to turn on/off Wi-Fi quickly. • Long tap to enter the Wi-Fi setting screen. • Bluetooth • Tap to turn on/off Bluetooth quickly. • Long tap to enter the Bluetooth setting screen.
3	Menu Center	<ul style="list-style-type: none"> • Tap Settings to access phone settings and features. • Tap Message to access the voice mails or the SMS messaging section • Tap Recorder to record a call or meeting. • Tap Notifications to view detailed notification message. • Tap 𐄂 to delete all notifications. • Tap Gallery to view photos and videos.

You can swipe up from the bottom of the screen to hide this screen.

The Home screen

On the home screen, you can view the phone's current state, add line keys, and access the dialing, Directory and history screens.

No.	Name	Description
1	Status bar	Displays the label of the current account and icons.
2	LTE information	4G LTE Signal strength
3	Telephone number	Displays the current registered telephone number If there is no account registered on the phone, No Service appears.
4	Digital Clock Widget	Displays the phone time and date.
5	Main UI icons	Dial: Tap to enter the dialing screen. DND: Tap to enter Do not disturb mode. History: Tap to enter the History screen and view history records. Directory: Tap to enter the Directory screen and view contacts.
6	Dsskey	Tap to see the line appearances of the phone and access the 'Features' section.
7	More	Tap to enter the control center.

Dss screen

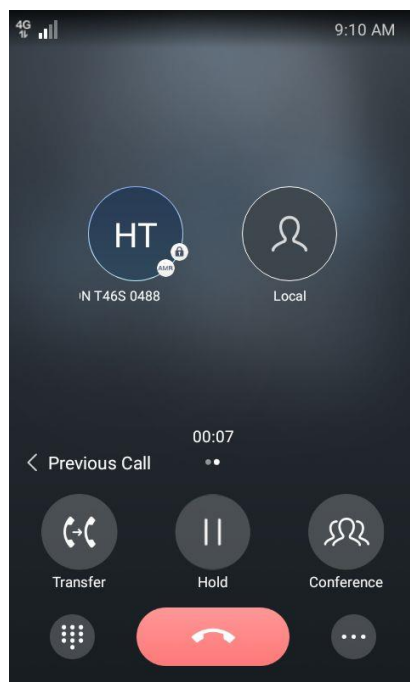

The Dsskey screen displays phone's line keys

No.	Application	Description
1		Tap to add a line key.
2	Line Key List	Shows the line key labels. You can customize the line keys.
3	Page Keys	Tap to turn to the corresponding page.

Call Screen

All of your active and held calls are displayed on the calls screen. When there is an active call and a held call, the calls screen is shown below:

You can tap the Previous/Next to switch between multiple calls.

Status icons

No.	Icons	Description
1		Mute mode: Mute mode is enabled.
2	4G	4G LTE active: The device is connected to a 4G LTE wireless network.
3		Signal Strength: Cellular network signal strength.
4		Network not available: No wireless network is available.
5		Wi-Fi active: Wi-Fi is active.
6		Wi-Fi available: A Wi-Fi network is available.

Navigating menus and fields

You can use different gestures on the touch screen to perform various operations.

Procedure

- To operate your phone using gestures, follow these tips:

Action	Gesture	Description
Tap		Touch an item on the screen with your finger, and then lift your finger.
Long Tap		Touch an item for about 2 seconds without lifting your finger from the screen till an action occurs.
Swipe		Touch and move. When you want to scroll quickly, swipe your finger across the screen, either up, down, left or right.
Drag		Touch and hold, then move. To stop scrolling, stop the dragging motion.
Pinch Open		Touch the screen with two or more fingers, and then move the fingers away from each other (stretch). Note: It works viewing images: screenshots, Wallpaper.
Pinch Close		Touch the screen with two or more fingers, and then move the fingers towards each other (pinch).

Entering information

The phone provides onscreen keyboard, phone keypad and dial pad to enter data. Phone keypad and dial pad provide a standard key layout, which enables you to use existing or familiar key positions.

Using the onscreen keyboard

When you use the onscreen keyboard, the following things you need to know:

If you want to	Action
Position the cursor.	Tap to the position.
Select all characters.	Long tap the entered character(s).
Cut/Copy characters.	<ol style="list-style-type: none"> 1. Long tap the entered character(s). 2. Drag  /  to select the characters you want to cut/copy. 3. Tap Cut/Copy on the top of the phone screen. 4. Long tap the desired field. 5. Tap Paste.
Delete more characters at a time.	<ul style="list-style-type: none"> • Long tap the entered character(s). • Drag  /  to select the characters you want to delete. • Long tap .
Replace characters.	<p>Drag your finger to highlight the characters you want to replace.</p> <p>Tap the desired character.</p>

English input method

You can use the English input method to enter information.

No.	Item	Description
1	26 English Letters	<ul style="list-style-type: none"> • Tap to enter letters. • Long tap a key then slide to choose one of the options to enter an alternate character.
2		Tap to switch to the uppercase input mode.
3		Tap to switch to the numeric&symbolic input mode.
4	Special Characters	Tap to enter the special character.
5		Long tap to change the input language.
6	Space Key	<ul style="list-style-type: none"> • Tap to enter spaces. <p>Long tap to change the input method.</p>
7	Label automatically to identify the context-sensitive	<ul style="list-style-type: none"> • Next Key: Tap to go to the next field.

features.

- Done Key: Tap to confirm the settings.
- Send Key: Tap to dial out the number.

8 Delete Key

- Tap to delete the entered characters one by one.
- Long tap to delete two or more characters.

Tap  to switch to the numeric & symbolic input mode as shown below:

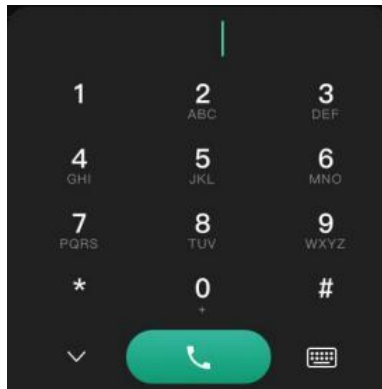

Tap  to switch to the symbolic input mode as shown below:

Using the phone keypad and dial pad

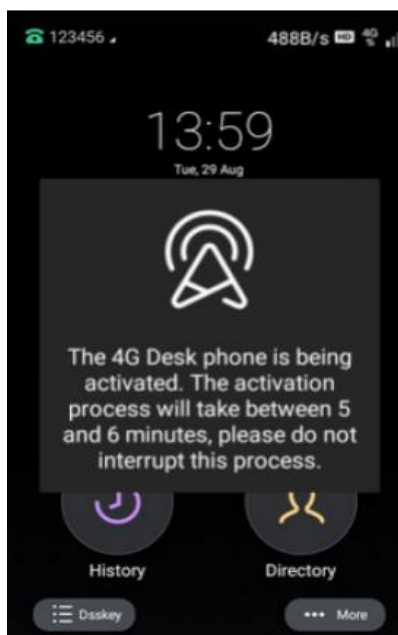

You can use the keypad on your phone or dial pad to enter data. The dial pad only provides digit keys, # key, and * key.

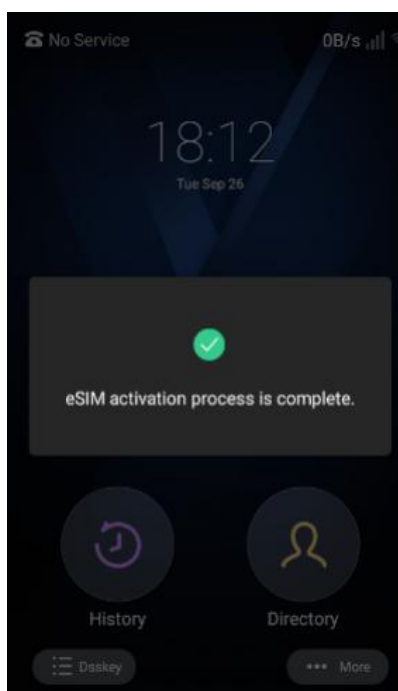

You can tap  to switch to the onscreen keyboard.

eSIM activation and device registration

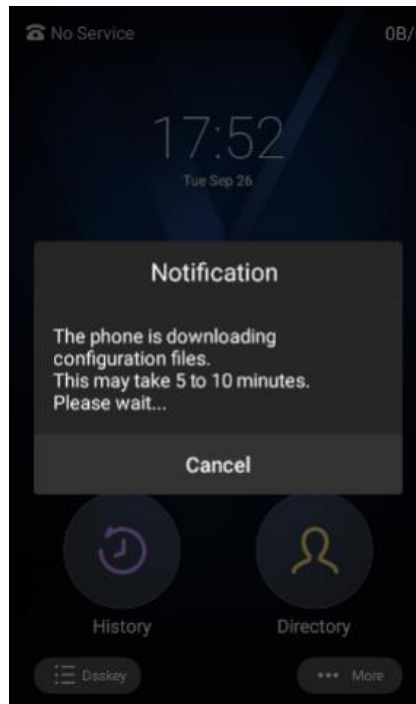

1. When the phone is powered on for the first time, it will automatically go through the 4G LTE network activation process.

2. After your eSIM card is activated, the 4G signal will be displayed in the upper-right corner of the phone screen.

3. After the eSIM activation, the phone will trigger the bootup process to download the configuration files when it connects to the LTE network.

- 4. After the configuration file is deployed, the phone will reboot to trigger the E911 location identification and register the LTE account automatically. Please update your phone's location, as needed.

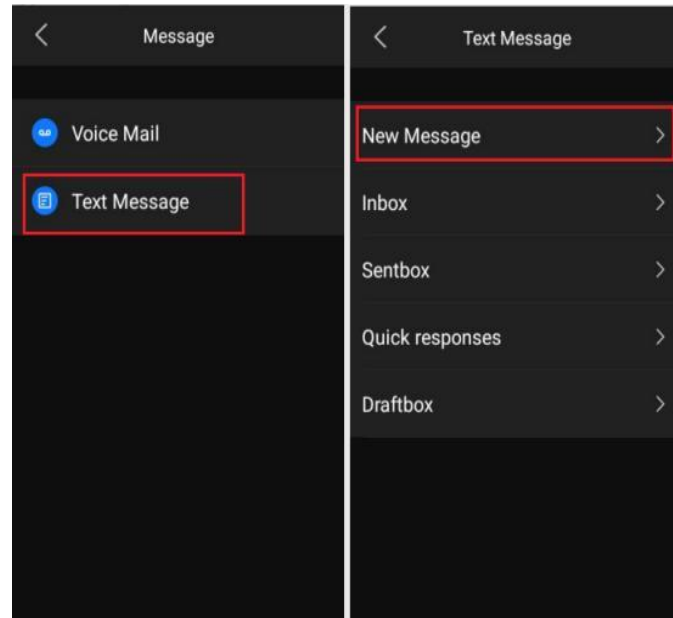

- 5. You can view the phone number by navigating to Status > LTE.

SMS

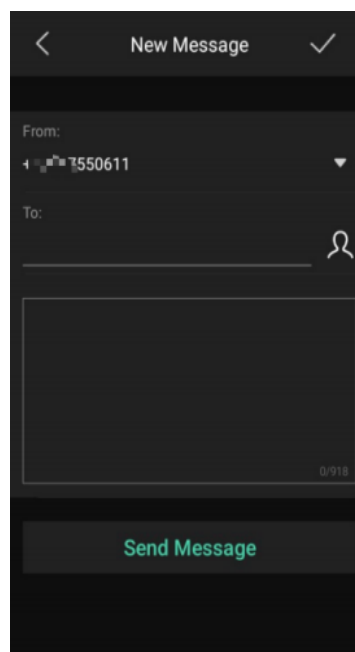

You can use this feature to send or receive messages.

Sending messages

1. Go to  Message > Text Message > New Message.

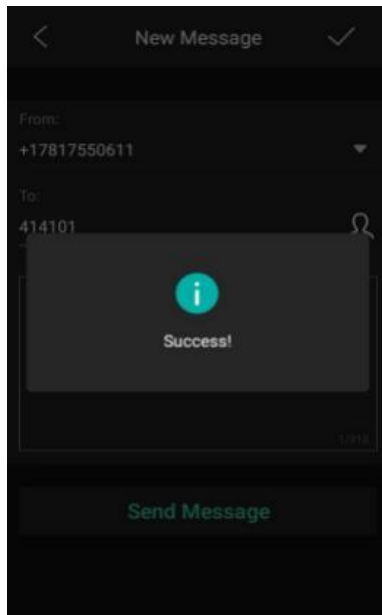

2. Enter the target number in the To field and the desired text in the input box on the New Message page.

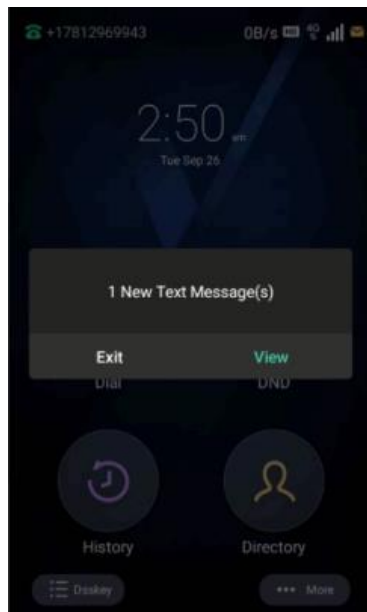

3. Tap Send Message to send a message.

If the message is successfully sent, the page prompts success and the target person will receive a message.

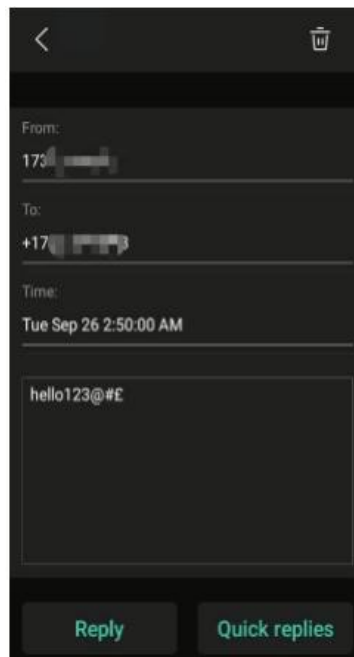

Receiving messages

1. When you receive a message, the page is displayed as below:

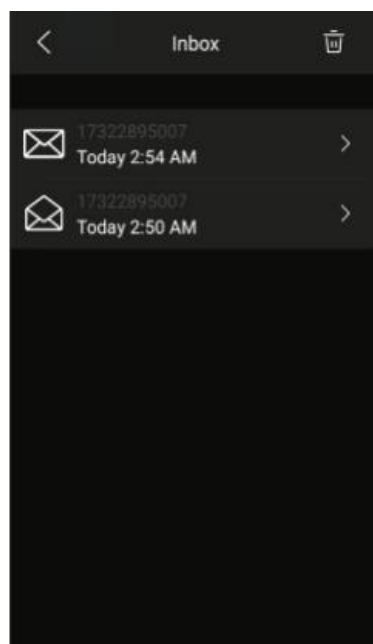

2. Do one of the following:

Tap View to view the message details.

Tap Exit to return to the idle page if you are busy at that time. You can tap  Message > Text Message > Inbox to view the message when you are available. The green message icon means you have a new, unread message. This will turn grey after you read the message.

Viewing the sent box

Go to  Message > Text Message > Inbox, and you can view the messages sent from this phone.

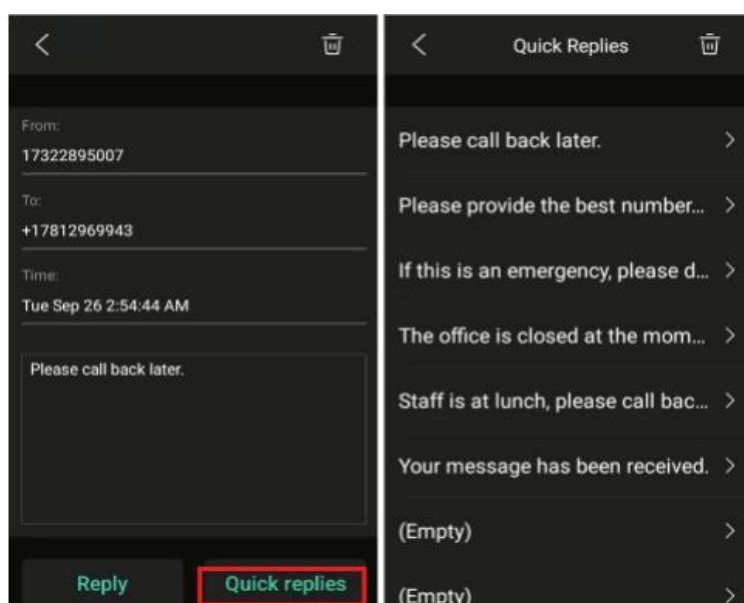

Viewing the draft box

Go to  Message > Text Message > Inbox, and you can view the unsent but saved messages.

Quick reply

When reading the received message, you can tap Quick replies to go to the Quick Replies page and select the desired text to reply.

LTE or LAN mode switching

The LTE Desk phone can only perform the first-time activation via LTE. However, once the phone is active at any point in time the phone is also capable to operate in LAN mode for those cases where the LTE signal is either too low or non-existent.

You can switch between the LAN mode and the LTE mode anytime you want. If the LTE signal becomes too low the phone will present a prompt and ask if you want to switch to LAN mode. Every time you switch modes, the phones must reboot to properly register via LTE or Broadband.

Switching between LTE and LAN modes

The 4G phone is under the LTE mode by default and signed in to an LTE account. It also allows you to sign in to the SIP account after switching to LAN mode. In the following section, we will

introduce how to switch between the two modes to use the desired account.

Switching from LTE to LAN

After switching to LAN mode, you can connect to a LAN or Wi-Fi and sign in to a SIP account (up to 16 accounts).

1. Go to Settings > Basic Settings > Switch Account mode, select LAN mode, and tap the check icon in the top-right corner.

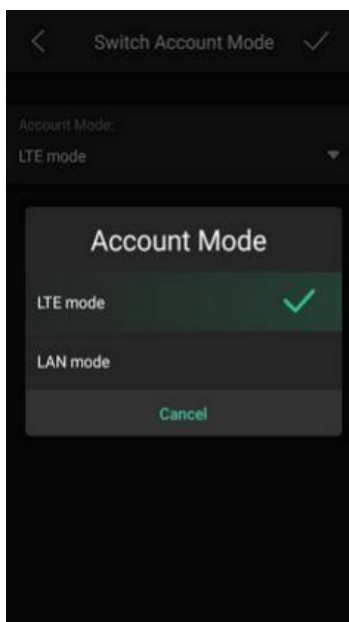

The phone will reboot to automatically trigger the E911 location identification.

Switching from LAN to LTE

After you switch to LTE mode, you can use one LTE account only.

1. Go to Settings > Basic Settings > Switch Account mode, select LTE mode, and tap the check icon in the top-right corner.

The phone will reboot to automatically trigger the E911 location identification.

Auto-detection

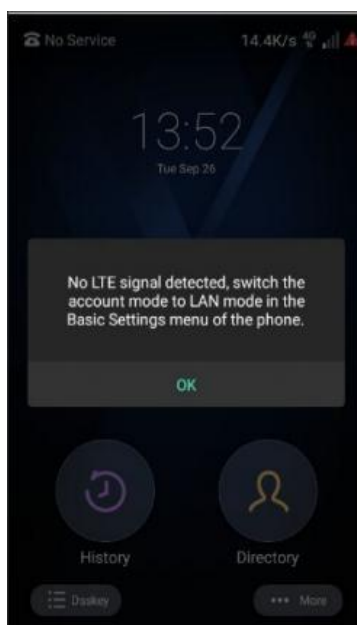

The phone will automatically detect available signals under Page 20 the following situations:

- Available 4G signal, LTE account login failure
- No 4G signal

- Poor 4G signal
- Airplane mode enabled, unavailable 4G Signal
- Available 4G signal under LAN mode

Available 4G signal, LTE Account Login Failure

Situation	Dialog	Operation
LTE account login failure (caused by base station faulty, no signal in the service area, the IMS PDN connection failure, etc.)	No LTE signal detected, switch the account to LAN mode in the Basic Settings menu of the phone.	Click OK and the dialog disappears automatically but the phone will not switch to the LAN mode automatically. Note: If you do not click OK, the dialog will not disappear.

No 4G signal

Under LTE mode, the phone has no 4G signal and the signal bars are greyed out.

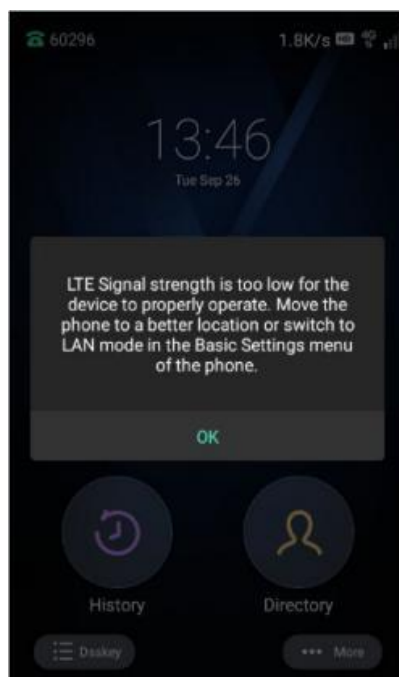

Situation	Dialog	Operation
The phone is disconnected from any wired or wireless network. The phone connects to a wired or wireless network.	No LTE signal detected, switch the account to LAN mode in the Basic Settings menu of the phone.	Click OK and the dialog disappears automatically but the phone will not switch to the LAN mode automatically. Note: If you do not click OK, the dialog will not disappear.

Poor 4G Signal

Situation	Dialog	Operation
The 4G signal is poor and not stable under the LTE mode	LTE Signal strength is too low for the device to properly operate. Move the phone to a better location or switch to LAN mode in the Basic Settings menu of the phone.	<ul style="list-style-type: none"> Click OK and the dialog disappears automatically. If you do not click OK, the dialog will not disappear. The dialog will pop up again if the phone detects the signal error after 5 minutes (the default detecting interval). When the 4G signal is available, the dialog will disappear automatically.

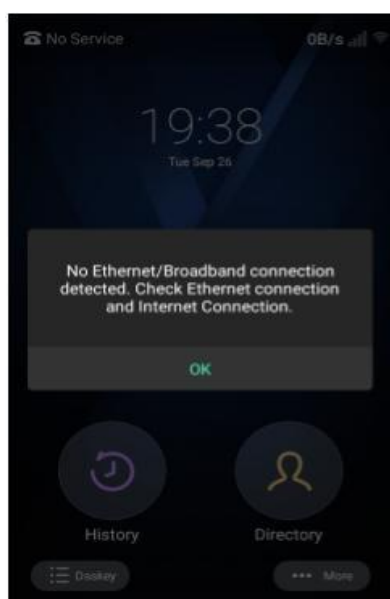

Note: the criteria for poor signal is $RSRP \leq -100$ dBm & $RSRQ \leq -20$ dB & $SINR \leq 0$ dB.

Airplane mode enabled, unavailable 4G signal

When you connect the phone to the LTE network but not the wired network, and you enable the Airplane Mode, the LTE network, the wired network, and connected Wi-Fi are all disabled.

Situation	Dialog	Operation
Airplane mode enabled and no available network.	No Ethernet/Broadband connection detected. Check Ethernet connection and Internet Connection.	No service.
Connect to a wired network so the phone detects available signal.	To register via LAN/Wi-Fi mode, the phone needs to reboot, press OK to continue.	Click OK, then the phone will reboot to switch to the LAN mode. Click Cancel, the dialog disappears and you are still in LTE mode with Airplane mode enabled. If you ignore the dialog, it will not disappear.
When you unplug then plug the network cable so the device detects available signal again.	To register via LAN/Wi-Fi mode, the phone needs to reboot, press OK to continue	Click OK, then the phone will reboot to switch to the LAN mode. Click Cancel, the dialog disappears and you are still in LTE mode with Airplane mode enabled. If you ignore the dialog, it will not disappear.
Connect to Wi-Fi.	To register via LAN/Wi-Fi mode, the phone needs to reboot, press OK to continue	Click OK, then the phone will reboot to switch to the LAN mode. Click Cancel, the dialog disappears and you are still in LTE mode with Airplane mode enabled. If you ignore the dialog, it will not disappear.

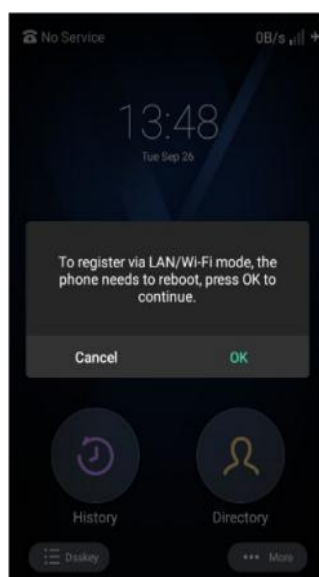

When you connect the phone to both the LTE network and the wired network, and you enable the Airplane Mode, both the LTE network and the wired network are disabled.

Situation	Dialog	Operation
When the phone detects available LAN signal	To register via LAN/Wi-Fi mode, the phone needs to reboot, press OK to continue.	<p>Click OK, then the phone will reboot to switch to the LAN mode.</p> <p>Click Cancel, the dialog disappears and you are still in LTE mode with Airplane mode enabled.</p> <p>If you ignore the dialog, it will not disappear.</p>
When you unplug then plug the network cable so the device detects available signal again	To register via LAN/Wi-Fi mode, the phone needs to reboot, press OK to continue.	<p>Click OK, then the phone will reboot to switch to the LAN mode.</p> <p>Click Cancel, the dialog disappears and you are still in LTE mode with Airplane mode enabled.</p> <p>If you ignore the dialog, it will not disappear.</p>
Connect to Wi-Fi	To register via LAN/Wi-Fi mode, the phone needs to reboot, press OK to continue.	<p>Click OK, then the phone will reboot to switch to the LAN mode.</p> <p>Click Cancel, the dialog disappears and you are still in LTE mode with Airplane mode enabled.</p> <p>If you ignore the dialog, it will not disappear.</p>

The Airplane mode is still enabled after the phone reboots.

Situation	Dialog	Operation
When the phone detects available LAN signal	To register via LAN/Wi-Fi mode, the phone needs to reboot, press OK to continue.	<p>Click OK, then the phone will reboot to switch to the LAN mode.</p> <p>Click Cancel, the dialog disappears and you are still in LTE mode with Airplane mode enabled.</p> <p>If you ignore the dialog, it will not disappear.</p>

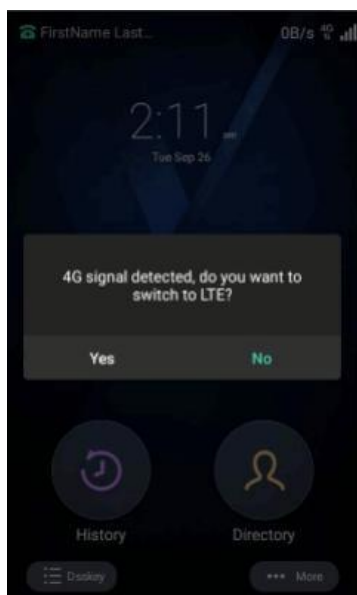

Available 4G signal under LAN mode

Prerequisites

1. Airplane mode is disabled.
2. The phone is under LAN mode.
3. Your administrator has enabled the mode detecting feature, which allows the phone to automatically detect the 4G signal under LAN mode.

Situation	Dialog	Operation
The phone detects that at least 3 bars of 4G signal are available	4G signal detected, do you want to continue using Ethernet/Wi-Fi or switch over to LTE?	<p>Click Yes, then the phone will reboot to switch to the LTE mode.</p> <p>Click No, the dialog disappears and you are still in LAN mode.</p> <p>If you ignore the dialog, it will not disappear.</p>
The phone detects that at least 3 bars of 4G signal are available after rebooting	4G signal detected, do you want to continue using Ethernet/Wi-Fi or switch over to LTE?	<p>Click Yes, then the phone will reboot to switch to the LTE mode.</p> <p>Click No, the dialog disappears and you are still in LAN mode.</p> <p>If you ignore the dialog, it will not disappear.</p>

Notes:

1. The dialog will pop up only when the phone is idle. It will not pop up when you are having a call, upgrading the phone, or under other situations.
2. If you ignore the dialog, the dialog will disappear automatically when the phone detects no available 4G signal. Otherwise, it will not disappear.
3. The phone will detect the signal at the interval your administrator sets. If the 4G signal is available again, the dialog will pop up again.

Call features

You can use the phone to place and answer calls, ignore incoming calls, transfer a call to someone else, conduct a conference call and perform other basic call features.

Placing calls

You can use your phone like a regular phone to place calls in many ways easily.

Placing a call from the dialer

The Dialer enables you to enter a number to place a call, and it displays a list of previously placed calls or contacts in your directory.

You can also select the desired contact from the search list, the placed call list or Directory.

Procedure

1. Do one of the following:
 - Tap Dial  .
 - Pick up the handset, press the Speakerphone key or the Headset key.
2. Enter a number.
3. Select Send  .

Placing multiple calls

When you are in a call, you can hold your current call and place a new call.

Procedure

1. Tap Hold to place the original call on hold.
2. Select New Call.
2. Enter the desired number or select a contact.
3. Select Send  .

Redialing a number

The phone keeps a record of all the placed calls. You can recall the contact you recently called.

Procedure

1. Press the Redial key.
 - The phone screen displays the placed calls list.
2. Tap the desired record.

Tip: Press the Redial key twice to recall the contact you called.

Placing an International Call

You can place calls to international phone numbers on your phone.

Procedure

1. Long press digit key 0 on the phone keypad until the plus sign (+) appears.
2. Enter the phone number with the country code.
3. Select Send  .

Note: An International plan must have been added to the line for International dialing to work properly. If there is no plan added to the line, the user will hear a network generated error noting the call cannot be completed.

Placing a call from the call history

You can place calls to contacts from the History list, which contains the calls that were recently placed, answered, missed, or forwarded.

Procedure

1. Tap History  .
 - The phone screen displays all call records.
2. Select the desired call list.
3. Tap the desired entry.

Placing a call from the directory

You can place a call to a contact directly from your directory.

Procedure

1. Tap  .
2. Select the desired directory.
3. If the contact was added to a specified contact group, you can select the desired contact group.
4. Tap the desired contact.
 - If the selected contact has multiple numbers, tap the desired number to dial out.

Answering calls

When you receive a call, you can choose to answer it manually or automatically.

Answering a call

When you receive an incoming call, the phone rings and the screen displays the information of the incoming call. You can choose to answer the incoming call.

Procedure

1. Do one of the following: Pick up the handset.
2. Press the Speakerphone key.
3. Press the Headset key.
4. Tap Answer or Line key.

The call is answered in the speakerphone (hands-free) mode by default.

Answering a call when in a call

You can answer a call when there is already an active call on your phone.

When you are in an active call and an incoming call arrives on the phone, a call waiting tone beeps, and the incoming call information is displayed.

Procedure

1. Select Answer.
 - The active call is placed on hold, and the incoming call becomes active.

Redirecting Incoming Calls

When you are not available to answer calls on your phone, you can forward the calls to another phone.

Forwarding All Incoming Calls to a Contact

You can set up the phone to forward all incoming calls to a contact.

Procedure

1. Go to Dsskey > User Setting > Call Forward.
2. Select the desired forwarding type.
 - Always Forward: Forwards all incoming calls.
 - Busy Forward: Forwards incoming calls when you're in a call.
 - No Answer Forward: Forwards all unanswered incoming calls.
3. Turn on the desired forwarding type.
4. Do one of the following:
 - Enter the number you want to forward to in the Forward to field.
 - Select  and select the desired contact.
5. If you select No Answer Forward, select the desired ring time to wait before forwarding in the After Ring Time field.
6. Select  >  .

Deactivating Call Forward

You can deactivate call forward when you no longer want to forward your calls.

Procedure

1. Go to Dsskey > User Setting > Call Forward.

2. Tap the desired forwarding type.
3. Turn off the desired forwarding type.

4. Select  >  .

Forwarding an Incoming Call Manually

You can manually forward the call to another contact while your phone rings.

Procedure

1. When the phone is ringing, tap  .
2. Enter the number you want to forward the incoming call to.
3. Select  . The phone prompts a call forward message.

Switching among the handset, speakerphone and headset modes

You can select the desired mode before placing a call or can alternate among Speakerphone, headset, and handset modes during a call.

When using the speakerphone or the headset, the LED indicator glows green.

Procedure

1. During the call, pick up the handset, press the Speakerphone key, or press the Headset key.
 - For example, if you're using the handset, press the Headset key to switch to the headset, or press the Speakerphone key to switch to the speakerphone.

Switching between calls screen and idle screen

During the call, you can access other applications to confirm some issues. After the operation, you can return to the call conveniently.

Switching to the Home Screen during a Call

During the call, you can go back to the idle screen to access other applications.

Procedure

1. Tap the three-dot icon and select Home Page to return the home screen.

Switching to the Talking Screen

After going back to the idle screen, you can return to the talking screen as long as the call is not ended.

Procedure

1. Tap Back To Talking on the top of the phone screen.

Silencing or rejecting incoming calls

When you receive an incoming call, you can choose to silence or reject the call instead of answering.

Silencing a call

You can silence a call to stop your phone from ringing. Even if you silence the call, the incoming call notification continues to be displayed on your phone.

Procedure

1. Select Silence  .

Rejecting a call manually

You can reject a call manually, and the call may be sent to voice mail. The rejected calls are displayed in the Received Calls list in your History list.

Procedure

1. Select Ignore.

Rejecting Anonymous Calls

You can reject incoming calls from the callers who have hidden their identities. As a result, your phone will not ring and you will not be notified of an attempted call.

Before You Begin

Check with your system administrator if the anonymous call rejection on code or off code is required. If required, get it from your system administrator.

Procedure

1. Go to Dsskey > User Setting > Anonymous Call Rejection.
2. Select the desired line.
3. Turn on Local Anonymous Rejection (Anonymous Rejection).

Rejecting calls with Do Not Disturb (DND)

You can enable DND to automatically reject all incoming calls when you do not want to be interrupted.

If you want to receive incoming calls from the specific numbers when DND is enabled, you can ask your system administrator to set DND Authorized Numbers.

Note: Check with your system administrator to find out if the DND feature is available on your phone.

Procedure

1. Tap the DND softkey set by your administrator.
 - The DND icon appears in the status bar. And the phone prompts you that DND is enabled.

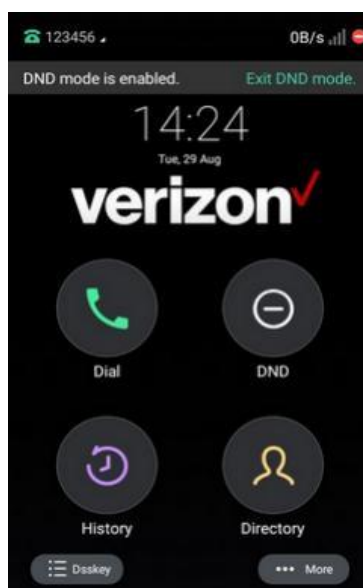

Activating DND for All Lines

If there are multiple lines on the phone, you can enable DND for all lines. After activating it, the phone will reject all incoming calls automatically.

Note: If both DND and busy forward are activated on the phone, calls will be forwarded to the configured destination number.

Procedure

1. Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap  on the homescreen.
2. The DND icon appears in the status bar. And the phone prompts you that DND is enabled.

Deactivating DND

You can deactivate DND when you are ready to resume receiving calls again.

Procedure

1. Do one of the following:

- Tap  on the homescreen.
- Tap Exit DND mode on the idle screen.

The DND icon disappears from the status bar.

Ending calls

You can end the current call at any time.

Procedure

1. Do one of the following:

- If you are using the handset, select  or hang up the handset. If you are using the headset, select .
- If you are using the speakerphone, press the Speakerphone key or select .

Muting/unmuting audio

When you are in a call, you can mute the audio, so that you can hear the other person, but they cannot hear you.

Procedure

1. Press the Mute key during a call.
 - The mute key LED glows red.
2. Press the Mute key again to unmute the call.
 - The mute key LED goes out.

Keep mute

In a meeting room, if incoming calls are answered automatically on your phone, callers may hear your discussion with your colleagues. You can keep the phone in mute to prevent this unintended situation.

The mute state of your phone persists across calls. The phone stays in the mute state until you unmute the microphone

manually or until the phone restarts.

Procedure

- 1 Press the mute key when the phone is idle.
 - The mute key LED glows red, and the mute icon appears on the idle screen.
- 2 Press mute key again to deactivate the mute state.

Holding and resuming calls

You can place an active call on hold and resume the call when you are ready. When you place a call on hold, the held party may hear the music or message on hold.

Holding a call

You can place an active call on hold on your phone.

Procedure

- 1 Press the Hold key or select Hold during a call.

Note: When you have multiple calls on the phone and the current call is held, you can select Previous Call/Next Call or swipe the screen to swap to the active call.

Resuming a held call

You can view and resume a held call on the phone.

Procedure

- 1 Press the Hold key or select Resume.
 - If multiple calls are placed on hold, select the desired call first.

Note: When you have multiple calls on the phone and the current call is active, you can select Previous Call/Next Call or swipe the screen to swap to the held call.

Diverting Calls to a Contact

You can divert all incoming calls from a particular contact to another contact. Auto divert has precedence over call forward.

Procedure

- 1 Tap Directory .
- 2 Tap  after the desired contact
- 3 Tap  to edit the contact information.
- 4 Enter a contact's number you want to divert the call to in the Auto Divert field.
- 5 Save the change.

Transferring calls

During a call, you can transfer the call to another contact.

You can use one of three ways:

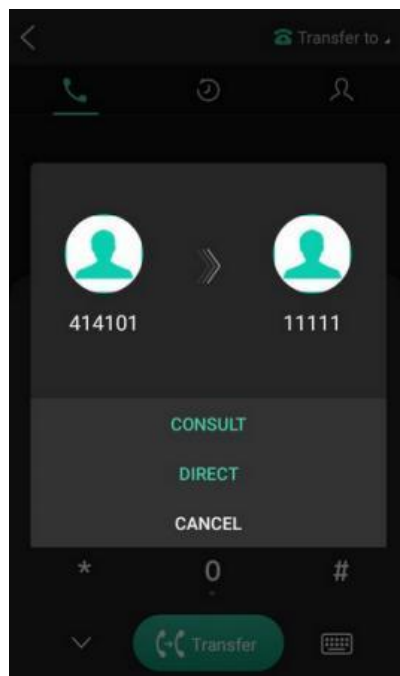

- Blind Transfer: Transfer a call directly to the third party without consulting.
- Semi-Attended Transfer: Transfer a call when receiving ringback.
- Attended Transfer (Consultative Transfer): Transfer a call with prior consulting.

Performing a direct (blind) transfer

You can transfer a call to another contact immediately without consulting with them first. You can enter the number, or select a contact from directory or history to perform a blind transfer.

Procedure

1. Press the Transfer key during a call.
2. Do one of the following:
 - Enter the number you want to transfer the call to, and press the Transfer. The phone will prompt a dialog box as the following shows:

Select Direct to complete the transfer. (The call will automatically dial out in about 5 seconds if you do not select Transfer.)

Performing Semi-Attended/Attended Transfer

You can transfer calls to other contacts immediately when receiving ringback or after consulting with them first.

Procedure

1. Select Transfer during a call.
2. Do one of the following:
 - Enter the number you want to transfer the call to.
 - Select Transfer > CONSULT to dial out.
 - Select  and select the desired contact to dial out.
 - Select  and select the desired entry to dial out.
3. Do one of the following:
 - When you hear the ringback tone, select Transfer to finish the semi-attended transfer.
 - After the contact answers the call, select Transfer to finish the attended transfer (consultative transfer).

Tip: If you are using a handset, the transfer can be completed by hanging up the handset.

Conference calls

The phone supports creating local conference.

During the conference, follow these tips:

- Use the handset or a headset if you're in an open environment.
- Mute your microphone when you are not speaking, especially in noisy environments.

- Avoid tapping or rustling papers near the microphone.
- Speak in your normal voice without shouting.

Local conference

You can create up to six-way local conference.

Setting up a local conference call

Procedure

1. Place a call to the first party.
2. Select Conference to place a new call.
The active call is placed on hold.
3. Dial the second party's number.
4. When the second party answers the call, select Conference to add the second party to the conference.
5. Repeat the above steps to add more parties to the conference.

Creating a hybrid conference

You can merge the calls on your phone, and connected mobile phone into a hybrid conference. There are many ways to create a hybrid conference, the following shows an example.

Before you begin

Make sure you have connected a mobile phone to your phone.

Procedure

1. Place a mobile call over Bluetooth on the mobile phone.
2. Place a call on the phone.
3. Tap Conference.
4. Tap the Hold Call.

The calls are merged into a conference call.

Holding or resuming a conference call

When you place a conference call on hold, other participants cannot hear each other until you resume the held conference call.

Procedure

1. Press the Hold key or tap Hold to place the conference on hold.
2. Press the Hold key again or tap Resume to resume the held conference call.

Muting or unmuting a conference call

When you mute the local microphone during a conference call, other participants can hear each other except you.

Procedure

1. Press the Mute key to mute the conference.
2. Press the Mute key again to unmute the conference.

Ending a conference call

When you end the conference call, the other parties drop the call.

However, the system administrator can set up your phone so that the other two parties remain connected when you end the conference call.

Procedure

1. Select End Call  .

Call recording

You can record up to 12 hours in one file. By default, the recorded files are saved in the internal SD card.

But if there is a USB flash drive connected to the rear USB port of your phone, the recorded files will be saved in the storage device according to the priority: USB flash drive>internal SD card.

Recording a call

You can record the important parts during an active call.

Important: Before call recording, especially those involving PSTN, it is necessary to know about the rules and restrictions of call recording in the country where you are.

It is also very important to inform all the call parties that you are recording and ask for their consent before recording the conversation.

Procedure

1. During a call, select Record.
 - The phone screen displays a recording icon and recording duration.

Recording a conference

You can record conference calls in the same way as other calls. All conference participants are recorded while recording.

The following lists exceptions:

- If one of the participants holds the conference call, only that participant is recorded. When a conference call is placed on hold, recording of the conference is paused. You can place or answer other calls, which will be recorded in the same file. When the conference call is resumed, recording of the conference resumes.
- If one of the participants mutes the conference call, only that participant is not recorded.

Setting a Mark When Recording a Call

You can set a mark when recording a call to mark the special moment. And there will be a red flag on this moment when playing the recorded file so that you can drag to the moment quickly.

Procedure

1. Select  .

The icon changes to  , the number will increase if you set more marks.

Stopping a recording

You can stop recording a call before the call ends. The recording also stops when the active call ends. The recording will be saved as a "*.aac" file in the internal SD card or the USB flash drive automatically.

Procedure

1. Do one of the following:
 - Select Stop during a call.

The recording icon and recording duration disappears. The screen prompts a message that the call is recorded successfully.
 - Select End Call  .

The recording icon and recording duration disappears, and the phone returns to the idle screen. The screen prompts a message that the call is recorded successfully.

Checking storage space

You can check the total space or available space of the phone or connected USB flash drive.

Procedure

Go to Settings > More > Storage.

Advanced call features

You can perform some server-dependent tasks on the phone. Contact your system administrator to find out if your phone supports these advanced call features.

Call pickup

You can use call pickup to answer someone else's incoming call on your phone. The phone supports the following two call pickup features:

- Directed call pickup - allows you to pick up incoming calls to another phone.
- Group call pickup - allows you to pick up incoming calls to any phone within a predefined group. Check with your system administrator to find out if this feature is available on your phone.

Picking up a call directly

You can answer a call that rings on another phone.

Before you begin

The target phone receives an incoming call. Your system administrator has enabled the directed call pickup and set the directed call pickup code.

Procedure

1. Dial a FAC (feature access code) followed by an extension (for example, *974605) to pick up a call directed to another user.

Picking up a group call directly

When any phone within a predefined group receives an incoming call, you can pick up that call on your phone. If there are multiple incoming calls on the group at the same time, you can only pick up the first incoming call.

Before you begin

Your system administrator has enabled the group call pickup and set the group call pickup code.

Procedure

1. Dial a FAC (feature access code) followed by an extension (for example, *984605) to pick up a call when any phone in the group receives an incoming call.

Call park and call retrieve

You can park a call, and then retrieve the call either from your phone or another phone. After parked, the call is placed on hold, you can continue the conversation after retrieving it.

Note: Call park is not available on all servers. Check with your system administrator to find out if it is available on your phone.

Parking a call

Procedure

1. During a call, select Park.
The phone will dial the call park code which is pre-configured.
2. Do one of the following:
 - If you want to park the call against the local extension, press the # key.
 - If you want to park the call against the desired extension, enter the extension (for example, 4606) where you want to park the call and press the # key.

If the call is parked successfully, you will hear a voice prompt that the call is parked.

Retrieving a parked call

Procedure

1. Pick up the handset, press the Speakerphone key or tap the line key.
2. Select Retrieve on the dialing screen.
The phone will dial the park retrieve code which is configured in advance.
5. Follow the voice prompt to retrieve:
 - Press the # key on the phone where the call is parked.
 - Enter the desired extension followed by # (for example, 4606#) on any phone.

Voice mail

Voice mail feature allows you to leave voice mails for someone or listen to your voice mail messages on your phone. This feature is set up on the server side and not all servers support this feature.

Setting the voice mail code

If you want to connect your phone to the message center, you need to set the voice mail code on your phone.

Before you begin

Get the voice mail code from your system administrator.

Procedure

1. Do one of the following to enter the control center:
2. Swipe down from the top of the screen.
Tap More.
3. Tap Message > Set Voice Mail.
4. Enter the voice mail code (for example, *4) in the desired account field.
5. Save the change.

Leaving voice mails

You can leave a voice mail to someone who is busy or inconvenient to answer the call.

Procedure

1. Follow the voice prompts to leave a voice mail.
2. Hang up to complete the voice mail.

Listening to voice mails

You can listen to your voice mails on the phone, to obtain a voice information sent by a contact.

Before you begin

You need to set the voice mail code in advance.

Procedure

1. Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap More.
2. Tap Message > View Voice Mail.
 - The phone screen displays the amount of new and old voice mails. You can tap the account to listen to voice mails.

Tip: When The phone prompts that the phone receives a new voice mail, you can press the Message key or select

Connect to dial out the voice mail access code directly.

Directory

The phone provides several types of phone directories, which can be customized by your system administrator.

Local directory

You can store up to 1000 contacts and 48 groups in your local directory, you can search, add, edit and delete a contact.

Managing the local directory groups

You can manage the Local Directory groups when the phone is idle.

Adding contact groups

To organize your contacts and make them easier to find, you can add additional groups in the Local Directory.

Procedure

- 1 Go to Directory > Local Directory > Custom Group.
- 2 Enter the desired group name.
- 3 Save the change.

Editing Contact Groups

You can change or add the group's information.

Procedure

- 1 Go to Directory > Local Directory
- 2 Select  after the desired group and select Rename.
- 3 Edit the group name.
- 4 Save the change.

Deleting contact groups

When you delete a contact group, the contacts in the group will not be deleted. You can view the contacts in All Contacts list.

Procedure

- 1 Go to Directory > Local Directory
- 2 Select  after the desired group and select Delete.
The phone prompts you to delete the group or not.
- 3 Select OK.

Managing the local directory contacts

You can manage the Local Directory contacts when the phone is idle.

Adding contacts

When you add a contact to your Local Directory, you can choose how much information you want to enter for your contact. You are required to enter a contact name at least for each new contact.

Procedure

- 1 Tap Directory.
- 2 If you want to add a contact to the specified contact group, select the contact group first.
- 3 Select .
- 4 Enter your contact's information.

5. Select the desired account from the Account field.
6. Select the desired photo from the Photo field.
7. Save the change.

Viewing contacts

You can view the local contacts from the Local Directory on your phone.

Procedure

1. Tap Directory.
2. If you want to view a contact to the specified contact group, select the contact group first. The contact names are displayed in alphabetical order.

Editing contacts

You can update your contacts' information.

Procedure

1. Tap Directory.
2. If you want to edit a contact from the specified contact group, select the contact group first.
3. Select the desired contact and tap  in the top-right corner.
4. Edit the contact information.
5. Save the change.

Deleting a contact

You can delete any contact from the Local Directory.

Procedure

1. Tap Directory.
2. If you want to delete a contact from the specified contact group, select the contact group first.
3. Select the desired contact.
4. Select Delete.
The phone prompts you to delete the contact or not.
5. Select OK.

Deleting all contacts

You can delete all contacts from the Local Directory.

Procedure

1. Tap Directory.
2. Long tap a contact.
3. Tap the radio box on the top-right of the screen.
4. Select  > Delete contacts.
The phone prompts you to delete all contacts or not.
5. Select OK.

Moving a local directory contact to blocklist

You can move a contact in the Local Directory to blocklist. Incoming calls from this contact will be rejected automatically.

Procedure

1. Tap Directory.
2. Tap the desired contact.
3. Select Blocklist.

The phone prompts you to move this contact to the blocklist or not.

4. Select OK.

Searching for contacts

In the Local Directory, you can enter search criteria to find your desired contact quickly.

Procedure

1. Tap Directory.
2. Do one of the following:
 - Tap  and enter your search criteria in the search field.
 - Select the desired letter (for example, T) along the right side to jump to contacts whose names start with T or t.

Blocklist

Incoming calls from the Blocklist are rejected automatically. You can store up to 30 contacts in the blocklist to block unwanted callers.

Adding a blocklist contact

You can add a blocklist contact on the phone to prevent someone from calling you.

Procedure

1. Go to Directory > Blocklist.
2. Select .
3. Enter the blocklist contact's information.
4. Save the change.

Viewing blocklist contacts

You can view the blocklist contacts from the Blocklist on your phone.

Procedure

1. Go to Directory > Blocklist.

Editing a blocklist contact

You can update your blocklist contacts' information.

Procedure

1. Go to Directory > Blocklist.
2. Select the desired contact and tap  in the top-right corner.
3. Edit the blocklist contact information.
4. Save the change.

Deleting blocklist contacts

You can delete one or all blocklist contacts. If a contact is removed from the blocklist, you can answer the call from the

contact normally.

Deleting a blocklist contact

If you want to answer a call from a specific contact, you need to remove it from the Blocklist.

Procedure

1. Go to Directory > Blocklist.
2. Select the desired contact.
3. Select Delete.

The phone prompts you to delete the contact or not.

4. Select OK

Deleting all blocklist contacts

You can delete all contacts from the Blocklist when you are ready to answer calls from them again.

Procedure

1. Go to Directory > Blocklist.
2. Long tap a contact.
3. Tap the radio box on the top-right of the screen.
4. Select  > Delete contacts.

The phone prompts you to delete all contacts or not.

5. Select OK.

Moving a blocklist contact to the local directory

You can move a blocklist contact to a Local Directory. Incoming calls from this contact will not be rejected automatically.

Procedure

1. Go to Directory > Blocklist.
2. Select the desired contact and tap  in the top-right corner.
3. Select Local Directory from the Group field.
4. Save the change.

Moving Multiple Contacts from Blocklist to Local Directory

Procedure

1. Go to Directory > Blocklist.
2. Long tap a contact.
3. Select the contacts you want to move.
4. Select  > Move to other group.
5. Select OK.

Mobile contacts

You can synchronize the contacts on your mobile phone to your IP phone. The mobile phone contacts will be imported to your IP phones and stored under the Mobile Contacts directory.

You can save mobile contacts to the local directory, but you cannot save a local contact to the Mobile Contacts directory.

Note: If you disconnect the Bluetooth-enabled mobile phone from phone or disable the phone to synchronize phone contacts,

the mobile contacts will not be displayed.

Saving a mobile contact to the local directory

You can save any mobile contact to the Local Directory, to conveniently call this contact after disconnecting the mobile phone from the phone.

Before you begin

Make sure your Bluetooth-enabled mobile phone has been paired with your IP phones, and mobile contact sync feature is enabled.

Procedure

1. Select Directory > Mobile Contacts.
2. Select after the desired contact.
3. Select Local Directory from the Group field.
4. Edit the contact information.
5. Save the change.

Searching for mobile contacts

In Mobile Contacts, you can enter search criteria to find your desired mobile contact quickly.

Before you begin

Make sure your Bluetooth-enabled mobile phone has been paired with and connected to your IP phones, and mobile contact sync feature is enabled.

Procedure

1. Select Directory > Mobile Contacts.
2. Do one of the following:
 - Select Search.
 - Enter your search criteria.

The contacts whose name or phone number matches the search string will be displayed in the result list.

Select the desired letter (for example, T) along the right side to jump to the contacts whose names start with T or t.

Updating the mobile contacts

You can update the Mobile Contact to synchronize the contacts you add, edit, and delete on the mobile phone to your phone.

Before you begin

Make sure your Bluetooth-enabled mobile phone has been paired with and connected to your phones, and mobile contact sync feature is enabled.

Procedure

1. Select Directory > Mobile Contacts.
2. Select  .
The phone prompts "Updating, please wait...".

Note: If you disconnect the mobile phone from the phone when the phone is updating the Mobile Contacts, the phone screen will prompt "Fail to download mobile contacts!", and the mobile contacts disappear from the phone directory list.

Remote phone book

If the Remote Phone Book feature has been enabled by your system administrator, you can access your corporate directory directly from your phone.

Searching for remote phone book contacts

In the Remote Phone Book, you can enter search criteria to find your desired contact quickly.

Procedure

1. Go to Directory > Local Directory > Remote Phone Book.
2. Do one of the following:

Select  .

Enter your search criteria in the search field.

Select the desired letter (for example, T) along the right side to jump to contacts whose names start with T or t.

Viewing remote phone book contacts

You can view the contact list of the remote phone book on your phone. Procedure

Procedure

1. Go to Directory > Local Directory > Remote Phone Book.

Saving a remote phone book contact to the local directory

You can save any remote phone book contact to the Local Directory, to conveniently call this contact when you can- not access the remote phone book.

Procedure

1. Go to Directory > Local Directory > Remote Phone Book.
2. Select the desired remote phone book.
3. Select the desired contact and select  .
4. Select Add.
5. Select Local Directory from the Group field.
6. Save the change.

Saving a remote phone book contact to the blocklist

You can save any remote phone book contact to the Blocklist on the phone, to prevent this contact from calling you.

Procedure

1. Go to Directory > Local Directory > Remote Phone Book.
2. Select the desired remote phone book.
3. Select the desired contact.
4. Select Blocklist.
5. Save the change.

Call history

The call history list includes Missed Calls, Placed Calls, Received Calls and Forwarded Calls, and each list holds 100 entries.

Call history icons

Each icon in the Call History indicates the corresponding call history status.

Icons	Description	Icons	Description
	Received Call		Missed Call

	Placed Call		Forwarded Call
--	-------------	---	----------------

Viewing history records

The history record saves the call information such as the caller's name and number, local line and call duration.

Procedure

- 1 Tap History.
- 2 Select the desired list.
- 3 Tap ① after the desired entry.

Saving a history record to local directory

To identify someone's call the next time, you can save a history record to the Local Directory.

Procedure

- 1 Tap History.
- 2 Select the desired list.
- 3 Select  > Add.
- 4 Edit the contact information.
- 5 Save the change.

Saving a history record to blocklist

You can prevent someone from calling you again by saving a history record to Blocklist.

Procedure

- 1 Tap History.
- 2 Select the desired list.
- 3 Scroll down to the bottom and select Blocklist.
- 4 Edit the contact information.
- 5 Save the change.

Deleting history records

You can delete one or all call records from the call history list.

Deleting a call record

You can delete any call record from the call history list.

Procedure

- 1 Tap History.
- 2 Select the desired list.
- 3 Tap ① after the desired entry.
- 4 Scroll down to the bottom and select Delete.
The phone prompts you to delete the record or not.
- 5 Select OK.

Deleting all call records

You can delete all call records from the call history list.

Procedure

- 1 Tap History.
- 2 Long tap an entry.
- 3 Tap the radio box on the top-right of the screen.
- 4 Select  > Delete calls.
The phone prompts you to delete all contacts or not.
- 5 Select OK.

System applications

The system applications are pre-installed on your phone and they cannot be uninstalled.

Gallery

You can access the Gallery to do many operations for the listed pictures/videos. You can also take pictures/videos with it.

Viewing Pictures/Videos

You can view the pictures/videos on your phone in different ways.

Procedure

- 2 Tap  to launch the Gallery.
By default, the pictures are displayed as thumbnails in the albums arrangement mode.
- 3 (Optional.) Tap Albums.
You can tap Albums/Locations/Times/People/Tags to view the pictures in different arrangement modes.
- 4 Swipe left/right to view all albums if required.
- 5 Select the desired album.
- 6 You can do the following:
Tap the album name on top-left of the phone screen.

Select Filmstrip view or Grid view to view the pictures/videos in different modes. Tap , and then tap Group by.
Select a desired group type in the pop-up dialog box to view the pictures/videos in different arrangement modes.
- 7 Tap a desired picture/video to preview the picture.

Note: The menu keys and Android keys will disappear after 5 seconds, you may tap the phone screen to show them again.

You can also select a desired picture and tap  > Details to view the detailed information.

Editing Pictures

You can edit pictures in the Gallery.

Rotating Pictures

You can rotate the picture as you want.

Procedure

- 1 Swipe down from the top of the screen.
- 2 Tap  to launch the Gallery.
- 3 Tap the desired picture album.

4. Tap the desired picture.
5. Tap  > Rotate left/Rotate right to rotate the picture left/right
6. Tap SAVE.

Adding a Filter for Pictures

You can add a filter for the picture to change its display style.

Procedure

1. Swipe down from the top of the screen.
2. Tap  to launch the Gallery.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Go to  > Edit > .
6. Select the desired filter.
7. Tap SAVE.

Adding a Frame for Pictures

You can add a frame for the picture to make it displayed more vivid.

Procedure

1. Swipe down from the top of the screen.
2. Tap  to launch the Gallery.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Go to  > Edit > .
6. Select the desired frame.
7. Tap SAVE.

Cropping Pictures

You can crop a picture to the desired size.

Procedure

1. Swipe down from the top of the screen.
2. Tap  to launch the Gallery.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Go to  > Edit > .
6. Do the following:
 - Tap Crop to resize the picture.
 - Tap Straighten to straighten the picture.
 - Tap Rotate to rotate the picture clockwise.

Tap Mirror to flip the picture symmetrically.

Tap Draw to draw the picture.

7. Tap SAVE.

Coloring Pictures

You can color pictures to make the pictures displayed better.

Procedure

1. Swipe down from the top of the screen.
2. Tap  to launch the Gallery.
3. Tap the desired picture.
4. Go to > Edit > .
5. Adjust the desired exposure, contrast, saturation and so on.
6. Tap SAVE.

Setting a Picture as Wallpaper

You can set a desired picture as wallpaper to make your phone more personalized.

Procedure

1. Swipe down from the top of the screen.
2. Tap  to launch the Gallery.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Go to > Set picture as.
6. If you want to set the picture as phone wallpaper, tap Wallpaper, and then tap Set wallpaper on the top-right of the screen.

Printing Pictures

You can print the desired pictures in the Gallery.

Before You Begin

Before printing the picture, make sure your phone has been connected to the network printer. For more information, refer to the documentation from the printer manufacturer.

Procedure

1. Swipe down from the top of the screen.
2. Tap  to launch the Gallery.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Go to > Print to print the picture.

Deleting Pictures/Videos

You can delete any useless picture/video from the Gallery.

Procedure

1. Swipe down from the top of the screen.

2. Tap  to launch the Gallery.
3. Tap the desired album.
4. Do one of the following:
 - Long tap the desired picture/video.
 - Go to > Select item.
 - Select the pictures/videos you want to delete.

You can also tap n items selected (n represents the number of pictures you selected) and then tap Select all to select all pictures.
5. Press delete the selected pictures/videos.
 - The phone prompts you whether to delete the pictures/videos.
6. Tap OK.

Sharing Pictures/Videos via Bluetooth

You can share the pictures/videos in the Gallery via Bluetooth.

Before You Begin

Before sharing pictures/videos via Bluetooth, make sure the Bluetooth device is discoverable.

Procedure

1. Swipe down from the top of the screen.
2. Tap  to launch the Gallery.
3. Tap the desired picture album.
4. Do one of the following:
 - Long tap one of the pictures/videos.
 - Go to > Select item.
 - Select the pictures/videos you want to share.

You can also tap n items selected (n represents the number of pictures/videos you selected) and then tap Select all to select all pictures/videos.
5. Tap , and then select Bluetooth.
6. If the Bluetooth is deactivated, it will prompt you to tap Turn on to activate the Bluetooth mode.
 - The phone scans and displays the available Bluetooth device automatically.
 - If there is no Bluetooth device found, go to  > Refresh to search for the Bluetooth devices.
7. Tap the desired Bluetooth device to share the pictures/videos.
 - The phone screen will prompt "Sending n file to"XXX""(n represents the number of pictures/videos that are being sent).
8. Accept the request of transferring files via Bluetooth on the Bluetooth device.
 - If the pictures/videos are successfully transferred, the notification center will display a notification "Bluetooth share: Sent files n successful, n unsuccessful."(n represents the number of files that are sent successfully or unsuccessfully).
 - You can tap the notification to view the detail information about the shared files.

Recorder

You can use the Recorder to record audio and manage the recording.

During recording, you can mark specific moments so that you can quickly find and listen to them later. You can record up to 12 hours in one file. The recording is saved in "*.amr" format with the name consisting of a prefix "record@" and date & time

stamp.

Recording audio

By default, the recorded audio is saved in the internal SD card. You can connect a USB flash drive to your phone, the recorded audio will be saved in the USB flash drive instead of the internal SD card.

Note: For more information on how to attach a USB flash drive, please refer to the Quick Start Guide for your phone.

Procedure

1. Do one of the following:

Swipe down from the top of the screen and tap Recorder.

Go to More > Recorder.

2. Tap  to start recording.

If you have inserted a USB flash drive, tap USB to save the recorded audio to USB flash drive.

3. Do one of the following:

Tap pause to pause the recording.

Tap  to set a mark.

The icon changes to , the number will increase if you set more marks. And there is a red flag on this moment when playing.

4. Tap  to end the recording and save the recording.

The recorded audio will be displayed on the right list automatically.

Playing a recorded call

You can browse and play back the recordings on your phone.

The recorded calls include a date & time stamp and the other party's number/IP address/name (or the first person's number/IP address/name you called), for example, 20160302-1452-Tom was created on March 2, 2016, at 14:52 and you have a call with Tom.

The recorded audio-only calls are saved in ".aac" format and the recorded video calls are saved in ".mkv" format. You can view the recorded files by Recorder or File Manager. The following is an example of playing the recorded call using the Recorder.

Tip: You can also play back the recorded calls on the phone or on a computer using an application compatible of playing ".aac"/".mkv" files.

Procedure

1. Do one of the following:

Swipe down from the top of the screen and tap Recorder.

Go to More > Recorder.

If you want to play the recorded audio saved in USB flash drive, tap USB.

2. Tap  before the desired recorded call to play the recorded call.

The length of the recording and a progress bar are displayed as the recording plays. You can press the Volume key to adjust the volume of audio output.

Pause/resuming a playback

When you receive an incoming call while playing a recording, the recording is paused automatically. You can resume the playback after handling the call. You can also pause the recording manually at any time.

Procedure

- 1 Tap  to pause playing the recording. The icon  appears on the phone screen.
- 2 Tap  to resume the playback.

Fast Forwarding/rewinding a playback

While a recorded file plays, you can fast forward or rewind the playback at any time.

Procedure

- 1 Drag the slider to skip forward the playing or rewind the playing.

If you have set marks for the recorded audio, you can drag the slider to the position with a red flag to listen to the marked moments.

Stopping a playback

While a recording plays, you can stop playing it at any time.

Procedure

- 1 Tap  to stop the playing.

Copying a Recorded Audio to USB Flash Drive

You can copy any recorded audio stored in Recorder application to your USB flash drive, as a result, you can view it on PC or other devices.

Before You Begin

Before copying recorded audio to USB flash drive, you should connect a USB flash drive first.

Procedure

- 1 Do one of the following:
 - Swipe down from the top of the screen and tap Recorder.
 - Go to More > Recorder.
 - The phone shows all recordings in the Audio Recorder list.

- 2 Tap  after the desired recorded audio.

- 3 Tap Copy to USB.

If the recorded audio is copied successfully, the phone screen will prompt “Copy successfully”.

The prompt “XX Copied” (XX indicates the date when the recorded audio is copied to the USB flash drive) appears under the corresponding recorded audio.

Copying All Recorded Audio to USB Flash Drive

You can copy all recorded audio to your USB flash drive, as a result, you can view them on PC or other devices.

Before You Begin

Before copying recorded audio to USB flash drive, you should connect a USB flash drive first.

Procedure

- 1 Do one of the following:
 - Swipe down from the top of the screen and tap Recorder.
 - Go to More > Recorder.
 - The phone shows all recordings in the Audio Recorder list.
- 2 Tap Edit.
- 3 Check the radio box on the top-left of the screen to select all recordings.

4. Tap Copy to USB.

The prompt “XX Copied” (XX indicates the date when the recorded audio is copied to the USB flash drive) appears under the corresponding recorded audio.

Renaming the recording

You can rename the recording for better recognition.

Procedure

1. Do one of the following:

Swipe down from the top of the screen and tap Recorder.

Go to More > Recorder.

If you want to rename the recorded audio saved in USB flash drive, tap USB.

2. Tap after the desired recording.

3. Tap Rename.

4. Enter the desired file name.

5. Tap OK.

Deleting a recording

You can delete local recordings or call recordings from Recorder. The local recording is named with a prefix “record@” and date & time stamp, while the call recordings are named with the date & time stamp.

Procedure

1. Do one of the following:

Swipe down from the top of the screen and tap Recorder.

Go to More > Recorder.

If you want to delete the recorded audio saved in USB flash drive, tap USB. 2. Tap  after the desired recorded audio.

2. Tap Delete.

The phone prompts you whether to delete the audio.

3. Tap OK.

Deleting all recordings

You can delete all the recording when you need additional space.

Procedure

1. Do one of the following:

Swipe down from the top of the screen and tap Recorder.

Go to More > Recorder.

If you want to delete all recorded audios saved in USB flash drive, tap USB.

2. Tap .

The phone prompts you whether to delete all the audio files.

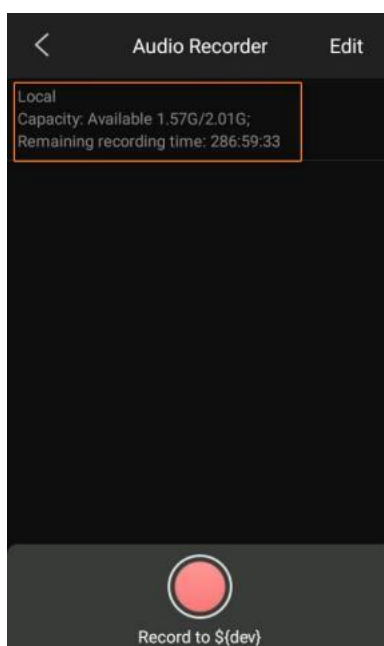

3. Tap OK.

Checking storage space

You can check the total space or available space of the phone or connected USB flash drive.

Procedure

1. Do one of the following:
Swipe down from the top of the screen and tap Recorder.
Go to More > Recorder.
You can see the storage space.

Customizing your phone

You can make your phone more personalized by customizing various settings.

Changing the Administrator Password

By default, you require an administrator password to access the Advanced/Advanced Settings menu. The default password is @N3ta!k2@2*.

Note: If you do not change the default password, the phone displays a warning icon in the status bar.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to More > Settings > Advanced > Set Password.
3. Enter your old and new password information.
4. Select  .

Wallpaper

You can change the background picture that is displayed on your phone.

The phone comes with a default background picture, you can change it to another built-in picture. You can also add personal pictures stored on a USB flash drive, or use a custom picture uploaded by your system administrator as the wallpaper.

Changing wallpaper on idle screen

You can set one of your pictures as the background image on your phone's idle screen.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Basic Settings > Display > Wallpaper.
3. Select Gallery or Wallpapers and then select the desired image.
4. Select Set wallpaper.

Adding a wallpaper from a USB flash drive

You can use a picture that is stored on a USB flash drive as the background image of your phone.

When USB flash drive is connected to your phone, the pictures on the USB flash drive are shown in the album. You can set a picture as wallpaper using the Gallery or File Manager.

We recommend that you add a picture that meets the size of the custom picture. Either the smaller or larger picture will be scaled proportionally to fit the screen.

Screen saver

The screen saver starts automatically when your phone has been idle for the preset waiting time. You can stop the screen saver by pressing any key.

Changing the waiting time for screen saver

You can set the waiting time after no activity before displaying the screen saver.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Basic Settings > Display > Screen Saver.
3. Select the desired waiting time from the Screen Saver Wait Time field.
4. Save the change.

Setting the screen saver type

The screen saver can start with different types and you can set it manually.

Your phone supports three screen saver types: Clock, Photo Frame, and Photo Table.

Procedure

1. Swipe left or right to go to the second idle screen.
1. Go to Settings > Basic Settings > Display > Screen Saver.
2. Select the desired screen saver type.
 - If you select Clock, select  to select Style or Night mode.
 - If you select PhotoFrame, select  to select the desired photo album(s).
 - If you select PhotoTable, select  to select the desired photo album(s).
3. Save the change.

Changing the Screen backlight and time

You can change the brightness of the phone screen during phone activity and inactivity.

Active Level: The intensity of the phone screen when the phone is active.

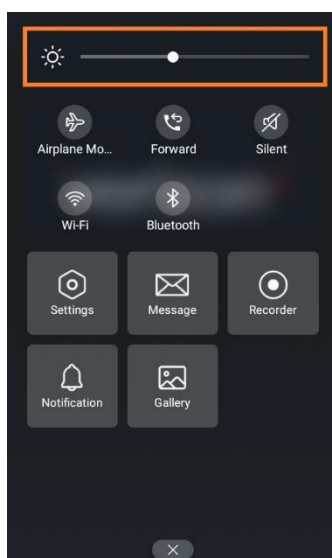

Backlight Time: The delay time to change the brightness of the phone screen when the phone is inactive.

Backlight time includes the following settings:

- **Always On:** Backlight is on permanently.
- **15s, 30s, 1min, 2min, 5min, 10min or 30min:** Backlight is changed when the phone is inactive after the designated time.

Procedure

1. Swipe down from the top of the screen.
2. Drag the backlight slider.

When dragging the slider, the control center (except the backlight slider) and notification center will be hidden. You can view the intensity changes of the phone screen in real-time.

If you lift your finger, the control center and notification center will be shown again.

Tip: You can only change the screen intensity during phone activity on the control center. To change the backlight time, go to Settings > Basic Settings > Display > Backlight.

Changing the language

Your phone supports several languages that you can choose to use on the phone.

Contact your system administrator to find out exactly which languages are supported on your phone.

Procedure

1. Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap More.
2. Go to Settings > Basic Settings > Language & Input > Language.
3. Select the desired language.
4. Save the change.
 - The phone language is changed to the selected one.

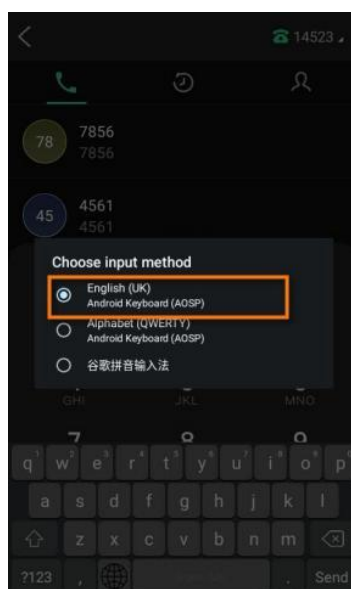

Changing the input method

The phone supports two kinds of input methods: English and 谷歌拼音输入法. The default input method is English. You can change the currently used input method.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Basic Settings > Language & Input > Current Input.
3. Select the desired input method.

You can also long tap the space key on the onscreen keyboard to change the input method. For English input method:

Time & date

You can set the time and date manually. The time and date formats are also variable.

Setting the time and date manually

If your phone cannot obtain the time and date automatically, you can set it manually.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Basic Settings > Time & Date > General.
3. Edit the date and time.
4. Save the change.
The time and date set on the phone will be changed accordingly.

Changing the time and date format

You can set the phone to display the time in 12-hour format or 24-hour format. You can also change the date format, including the options to display the day (D), month (M), and year (Y).

Note: Your system administrator can customize the date format.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.

2. Go to Settings > Basic Settings > Time & Date > Time & Date Format.
3. Select the desired time format or date format.
4. Save the change.

Phone lock and Administrator Password

Phone lock helps you protect your phone from unauthorized use.

Accessing the Advanced Settings with Administrator Password

To enter the advanced settings on your phone, enter the default password: @N3ta!k2@2*

Setting the phone lock

You can manually lock the phone or wait a specified time to automatically lock the phone. When your phone is locked, you can:

- Dial emergency numbers.
- Reject incoming calls.
- Answer incoming calls.
- End the call.

Procedure

1. Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap More.
2. Go to Settings > Basic Settings > Phone Lock.
3. Enter the desired PIN (default PIN: 123) in the Unlock PIN, New PIN, and Confirm PIN fields.
4. Save the change.
5. Select Enabled from the Lock Enable field.
6. Enter the desired interval (0 - 3600 seconds) in the Auto Lock field.
7. Save the change.

Note: Enter the password: @N3ta!k2@2*

Locking your phone manually

You can lock the phone manually before the phone is automatically locked.

Before you begin

Make sure that the phone lock is set.

Procedure

1. Long press # key when the phone is idle.
 - The lock icon appears on the phone screen.

Unlocking your phone

You can use an unlock PIN to unlock the phone.

If you forget the unlock PIN, you can enter the administrator password to unlock your phone, and then automatically access the PIN change screen.

Procedure

1. Tap the screen or tap the locked key, the phone prompts you to enter an unlock PIN.
2. Enter the desired PIN (default: 123) in the Unlock PIN field.

3. Select OK.

The lock icon disappears from the phone screen.

Changing your phone unlock PIN

The default unlock PIN is "123". For security reasons, you should change the default unlock PIN as soon as possible.

Procedure

1. Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap More.
2. Go to Settings > Basic > Change PIN.
3. Enter your old and new unlock PIN respectively.
 - The unlock PIN length must be within 15 digits.
4. Save the change.

Line keys

Line keys allow you to quickly access features such as recall and speed dial. The line key can indicate the monitored status when the line keys are assigned with particular features, such as BLF.

You can assign predefined functions to line keys. You can also define a label for a line key feature which will appear on the phone screen.

Assigning functionality to a line key

You can assign functions to a line key, as a result, you can access this function quickly by tapping this line key.

Procedure

1. Tap Dsskey.
2. Tap  on the top-right of the line key list.
3. Select the desired key type from the Type field.
4. Configure the settings for the corresponding key type.
5. Save the change.

Changing the locations of the line keys

You can change the order in which your line keys display on the phone screen.

Procedure

1. Tap the desired page key if required.
2. Drag a line key to the desired location at which another line key locates.

Deleting a line key

You can delete a line key when you no longer need the corresponding function

Procedure

1. Drag the desired line key to the Delete field.
 - The phone prompts you to delete the DSS key or not.
2. Select OK.

Audio settings

You can change the basic audio settings on your phone.

Adjusting the volume

You can adjust the volume of the ringer, media, and audio during a call. \

Procedure

- 1 Press the Volume key.

Setting the ring tone

You can set distinctive ring tones for groups or contacts in your Local Directory so that you can identify the caller when your phone rings.

The ring tones are used according to this priority: Contact ring tone>Group ring tone>Account ring tone >Phone ring tone.

Setting a ring tone for the phone

You can choose a ring tone for all incoming calls.

Procedure

- 1 Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap More.
- 2 Go to Settings > Basic Settings > Sound > Ring Tones > Common.
- 3 Select the desired ring tone.
- 4 Save the change.

Setting a ring tone for an account

You can select a unique ring tone for an individual account.

Procedure

- 1 Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap More.
- 2 Go to Settings > Basic > Sound > Ring Tones.
- 3 Select the desired account.
- 4 Select the desired ring tone.
 - If Common is selected, this account will use the ring tone selected for the phone.
- 5 Save the change.

Setting a ring tone for a group

You can select a unique ring tone for various groups in your Local Directory.

Note: You can only set a ring tone for a group that is added manually.

Procedure

- 1 Tap Directory > Local Directory.
- 2 Select **...** after the desired group and select Ring.
- 3 Select the desired ring tone.

If Auto is selected, this group uses the ring tone according to the default priority.

If a specific ring tone is selected, this group uses the ring tone according to the priority: Contact ring tone>Group ring tone.

4. Save the change.

Setting a ring tone for a contact

You can select a unique ring tone for various contacts in your Local Directory. This helps you quickly identify callers according to the ring tones.

Procedure

1. Tap Directory > Local Directory.
2. Select the desired contact group first.
3. Select the desired contact and tap  in the top-right corner.
4. Select the desired ring tone from the Ring field.
If Auto is selected, the contact uses the ring tone according to the default priority.
5. Save the change.

Disabling the key tone

If you disable the key tone, the phone will not produce a sound when pressing the keypad keys.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Basic > Sound > Key Tone.
3. Turn off Key Tone.
4. Save the change.

Enabling touch tone

If you enable touch tone, the phone will produce a sound when you tap an option on the phone screen.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Basic Settings > Sound > Touch Tone.
3. Turn on Touch Tone.
4. Save the change.

Configuring notification sound

The phone will produce a notification sound when receiving a notification (for example, incoming email notification).

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Basic Settings > Sound.
3. Tap the desired notification sound from the Notification Sound field.
4. Select OK

5. Save the change.

Enabling silent mode

If you turn on the silent mode, your phone won't produce a ring tone/key tone/touch sound/notification sound from phone's speaker.

Procedure

1. Do one of the following:
 - Go to Settings > Basic Settings > Sound, turn on Silent Mode, save the change.
 - Press the Volume key to adjust the ringer volume to the minimum.
 - Swipe down from the top of the screen and toggle Silent on.

Note: You may have no permission to turn on the silent mode. Contact your system administrator for more information.

Bluetooth

Bluetooth enables low-bandwidth wireless connections within a range of 20 feet. The best performance is in the 3 to 6 feet range.

You can activate the Bluetooth mode, and then pair and connect the Bluetooth device with your phone. You can pair up to countless Bluetooth devices with your phone; however, you can connect up to two different types of Bluetooth devices at a time. You can also share files with friends via Bluetooth.

You can pair and connect a Bluetooth headset/speakerphone/microphone or a Bluetooth-enabled mobile phone to your phone. And the Bluetooth operating instructions on different Bluetooth devices are the same.

Activating the Bluetooth mode

You should activate the Bluetooth mode first when you need to connect the Bluetooth device to your phone.

Procedure

1. Do one of the following:
 - Swipe down from the top of the screen.
 - Swipe left or right to go to the second idle screen, go to Settings > Basic Settings > Bluetooth.
2. Turn on the Bluetooth.
 - The phone automatically scans the available Bluetooth devices in your area.
 - The Bluetooth icon appears in the status bar.

Pairing and connecting the Bluetooth headset

You can pair and connect the Bluetooth headset to handle calls on the phone.

Before you begin

Make sure that the Bluetooth headset is discoverable.

Procedure

1. Do one of the following:
 - Swipe down from the top of the screen and long tap the Bluetooth icon.
 - Go to More > Settings > Basic Settings > Bluetooth.
2. Tap  to search for the Bluetooth devices.
3. Tap the desired Bluetooth headset to connect to your phone.
 - The connection will be completed successfully with a prompt appears under the Bluetooth headset name.
 - The Bluetooth icon  appears in the status bar.

Pairing and connecting the Bluetooth-enabled mobile phone

When you need to use the phone to handle the mobile phone's calls, you can pair and connect the Bluetooth-enabled mobile phone.

You can only connect one Bluetooth device at a time. After connection, the phone will automatically find an available line key and assign the line key for Mobile Account. The Mobile Account key's default label is "Mobile Account". If there is no available line key, you may assign it manually.

Before you begin

Make sure that the Bluetooth-enabled mobile phone is discoverable.

Procedure

1. Do one of the following:

Swipe down from the top of the screen and long tap the Bluetooth icon.

Go to More > Settings > Basic Settings > Bluetooth.

2. Tap  to search for the Bluetooth devices.

3. Tap the desired Bluetooth-enabled mobile phone.

4. Tap Pair on both mobile phone and phone.

The phone prompts you to sync phone contacts temporarily.

5. Tap OK to enable the mobile contacts sync feature and the phone will sync the mobile contacts temporarily, or tap Cancel to disable mobile contacts sync feature.

The connection will be completed successfully with a prompt appears under the Bluetooth-enabled mobile phone name.

Note: If you enable mobile contacts sync feature, you also need to authorize the phone to sync the contacts temporarily on the mobile phone.

Pairing and connecting two Bluetooth devices

You can connect two Bluetooth devices on the phone at a time, for example, a Bluetooth-enabled mobile phone and a Bluetooth headset.

Before you begin

Make sure that the Bluetooth devices are discoverable.

Procedure

1. Do one of the following:

Swipe down from the top of the screen and long tap the Bluetooth icon.

Go to More > Settings > Basic Settings > Bluetooth.

2. Tap  to search for the Bluetooth devices.

3. Pair and connect the two Bluetooth devices respectively.

Note: The phone does not support connecting two Bluetooth devices of the same type at the same time. The Bluetooth channel cannot support two devices at the same time, and Bluetooth-enabled mobile phone has higher priority than the Bluetooth headset.

Syncing the mobile contacts to the phone

You can sync mobile contacts to your phone. Then you can view a contact without accessing your mobile phone.

Note: Not all mobile phones support syncing the mobile contacts to phone. For more information, contact your system administrator.

Enabling the mobile contacts sync feature

You can choose to enable the phone to sync the mobile contacts.

Before you begin

Make sure that the Bluetooth-enabled mobile phone is paired and connected to your phone and the phone audio feature is enabled.

Procedure

1. Do one of the following:
 - Swipe down from the top of the screen and long tap the Bluetooth icon.
 - Go to More > Settings > Basic Settings > Bluetooth.
2. Tap  after the desired Bluetooth-enabled mobile phone name.
3. Select Mobile Contacts Sync.

Note: You need to authorize the phone to synchronize the contacts temporarily on the mobile phone first, and then the mobile contacts directory will appear in the phone directory list.

Viewing your mobile contacts

You can view a list of mobile contacts on the phone.

Before you begin

Make sure that the mobile contact sync feature is enabled.

Procedure

1. Go to Directory > Mobile Contacts.

Handling a mobile phone call on the phone

You can handle a mobile phone call on your phone, the phone acts as a hands-free device for your mobile phone.

The call information appears on both your phone and mobile phone screen. You can control the call's audio to go through the mobile phone or phone on your mobile phone. If you choose Bluetooth, the audio will go through the phone; if you choose Handset earpiece or Speaker, the audio will go through the mobile phone.

Before you begin

Make sure that the Bluetooth-enabled mobile phone is paired and connected to your phone, and the phone audio feature is enabled.

Procedure

1. Do the following on the phone:

Place a call. Tap the Mobile Account line key first, and then place a call or multiple calls to the mobile contacts.

Answer a call. An incoming call to your mobile phone is also shown on the phones, you can answer the call on the phone. The phone will firstly match the contacts in the mobile contacts directory to present the caller identity.

During the call, you can hold/resume, mute/unmute or end the call on the phone.

Configuring the phone audio feature

After syncing the mobile contacts to your phone, the phone acts as a hands-free device for your mobile phone. The call is made through your mobile phone, but the audio is present and the call control is done by the phone.

If a Bluetooth headset is connected to the phone, you can choose to answer a call using the Bluetooth headset.

Procedure

1. Do one of the following:
Swipe down from the top of the screen and long tap the Bluetooth icon.
Go to More > Settings > Basic Settings > Bluetooth.
2. Select  after the desired Bluetooth device name.
3. Turn on Phone audio.
4. Save the change.

Configuring the Media Audio Feature

If a Bluetooth headset is connected to the phone, you can enable the media audio feature to stream the audio from IP phone to Bluetooth headset. The Bluetooth headset acts as the player for the SIP phone.

Procedure

1. Do one of the following:
Swipe down from the top of the screen and long tap the Bluetooth icon.
Go to More > Settings > Basic Settings > Bluetooth.
2. Select  after the connected Bluetooth headset name.
3. Turn on Media audio.
4. Save the change.

Changing your phone's Bluetooth name

You can change the Bluetooth name for your phone to identify your phone to other Bluetooth devices. By default, the phone is identified as "Yealink-T64-LTE" by other Bluetooth devices.

Before you begin

Make sure that the Bluetooth mode is activated.

Procedure

1. Do one of the following
Swipe down from the top of the screen and long tap the Bluetooth icon.
Go to More > Settings > Basic Settings > Bluetooth.
2. Select Edit My Device Information.
3. Enter the desired name in the Device Name field.
4. Save the change.

Disabling Bluetooth Device Discovery

After the Bluetooth is activated, the phone is automatically placed in Open Discover mode to make it visible to other Bluetooth devices.

You can choose to disable this feature to not allow your phone to show as an available device on other Bluetooth devices.

Procedure

1. Do one of the following:
Swipe down from the top of the screen and long tap the Bluetooth icon.
Go to More > Settings > Basic Settings > Bluetooth.
2. Select Edit My Device Information.
3. Turn on Open Discover.
4. Save the change.

Renaming the paired Bluetooth device

You can rename the paired Bluetooth device to make it recognized more easily.

Procedure

1. Do one of the following:
Swipe down from the top of the screen and long tap the Bluetooth icon. ○ Go to More > Settings > Basic Settings > Bluetooth.
The phone screen shows the paired and connected Bluetooth device.
2. Tap  after the connected Bluetooth device name.
3. Enter the desired device name in the Rename field.
4. Save the change.

The renamed Bluetooth name will be displayed in the PAIRED DEVICES list on your phone. The Bluetooth device name displayed in the scanning list of other devices will not be changed.

Unpairing the Bluetooth device

After unpairing the Bluetooth device, next time you activate the Bluetooth, the phone will not automatically reconnect to the device. You need to scan, pair and connect with the device again.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Go to Settings > Basic Settings > Bluetooth.
The phone screen shows the paired and connected Bluetooth device.
3. Tap  after the connected Bluetooth device name.
4. Tap Unpair.

Sending files via Bluetooth

You can use the Gallery or File Manager to share pictures, videos or audio with an available Bluetooth device in your area.

Receiving files via Bluetooth

The available Bluetooth devices in your area can share pictures, audio, videos, documents with your phone. You can use the corresponding system application to view the files.

Procedure

1. Share a file with the phone on your Bluetooth device.
The phone will play a notification sound, and the phone prompts you whether to accept the incoming file.

2. Tap Accept to start receiving the file.

The phone prompts “The file will be received. Check progress in the Notification panel.”. The icon will be displayed in the status bar.

3. (Optional.) Swipe down from the top of the screen.

Tap the notification “Bluetooth share: Received files”.

You can use the corresponding system applications to view the file.

Disconnecting the Bluetooth device

When you disconnect a Bluetooth device, it remains paired so that you can reconnect it to your phone.

Procedure

1. Do one of the following:

Swipe down from the top of the screen and long tap the Bluetooth icon.

Go to More > Settings > Basic Settings > Bluetooth.

2. Tap the connected Bluetooth device.

3. Tap OK.

Deactivating the Bluetooth mode

You can deactivate the Bluetooth mode when you no longer use a Bluetooth device.

Procedure

1. Do one of the following:

Swipe down from the top of the screen.

Go to More > Settings > Basic Settings > Bluetooth.

2. Turn off the Bluetooth.

The Bluetooth icon disappears from the status bar.

Wireless network

The phone can be connected to the wireless network if Wi-Fi is available within the area.

Note: Enabling Bluetooth may degrade your wireless network connection. For improved wireless network performance, you should disable Bluetooth when it is not in use.

Activating the Wi-Fi mode

You can activate the Wi-Fi mode to connect your phone to an available wireless network.

Procedure

1. Do one of the following:

Swipe down from the top of the screen.

Go to More > Settings > Basic Settings > Wi-Fi.

2. Turn on the Wi-Fi.

The phone automatically scans the available wireless networks in your area. The Wi-Fi icon appears in the status bar.

Connecting to the wireless network

After you have activated the Wi-Fi mode, you can connect the phone to the wireless network.

When the phone is connected to a wireless network, the Wi-Fi icon  will display in the status bar.

Connecting to an available wireless network manually

You can use the password provided by your system administrator to connect the phone to a secured wireless network.

Before you begin

Make sure that the Wi-Fi mode is activated.

Procedure

- Do one of the following:
 - Swipe down from the top of the screen and long tap the Wi-Fi icon.
 - Go to More > Settings > Basic Settings > Wi-Fi.

The phone will automatically search for available wireless networks in your area.
 - (Optional.) To research the available network, select  > Scan.
 - Tap the desired wireless network (SSID) to connect to it.
 - Enter the desired password in the Password field.
 - (Optional.) Tap  to make the password visible.
 - Select Show advanced options to configure the HTTP proxy for the Browser.
 - Select Connect.
- Once the connection has completed successfully, the prompt “Connected” appears under the corresponding SSID.

Adding a wireless network manually

If your gateway/router has SSID broadcast disabled, it doesn't appear in the scanning results. Then you must manually add a wireless network.

Before you begin

Get the available wireless network information from your system administrator. Make sure that the Wi-Fi mode is activated.

Procedure

- Do one of the following:
 - Swipe down from the top of the screen and long tap the Wi-Fi icon.
 - Go to More > Settings > Basic Settings > Wi-Fi.
- Select  > Add.
- Enter the desired value in the Network SSID field.
- Tap the desired value from the Security field.
 - If you select WEP or WPA/WPA2 PSK, enter the password.
 - If you select 802.1x EAP, tap the desired value from the EAP method field, and enter additional information.
- (Optional.) Tap  to make the password visible.
- Select Show advanced options to configure the HTTP proxy for the Browser.
- Select Save.

Viewing the wireless network information

You can view the detailed wireless network information, such as Profile Name, SSID and Signal Strength.

Procedure

- Do one of the following:

Swipe down from the top of the screen and long tap the Wi-Fi icon.

Go to More > Settings > Basic Settings > Wi-Fi.

2. Select Wi-Fi Status.
3. (Optional.) Drag up and down to scroll through the list of wireless network information.

Disconnect from a wireless network

You can disconnect the wireless network connection from your phone.

Procedure

1. Do one of the following:
Swipe down from the top of the screen and long tap the Wi-Fi icon.
Go to More > Settings > Basic Settings > Wi-Fi.
2. Tap the connected SSID (the top one).
3. Select Forget.
Tip: You can also disconnect from the wireless network by deactivating the Wi-Fi mode.

Deactivating the Wi-Fi mode

You should deactivate the Wi-Fi mode when you need to connect your phone to the wired network.

Procedure

1. Do one of the following:
Swipe down from the top of the screen.
Go to More > Settings > Basic Settings > Wi-Fi.
2. Turn off the Wi-Fi.
The Wi-Fi icon disappears from the status bar.

Maintaining your phone

When your phone is unable to operate properly, you need to investigate or troubleshoot issues along with other tasks your system administrator may ask you to perform.

Investigating warnings

The warning icon lets you know that your phone has one or more important issues.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Status > General.
The warning detail is displayed in the Warning field.

Clearing warning icon

You can temporarily remove the warning icon from the status bar. However, the warning message still is displayed on the Status screen until the issue is fixed.

The warning icon appears in the status bar again after reboot if the issue is not fixed.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Status > General.
3. Tap the Warning field.
The phone prompts you to clear the warning icon or not.
4. Tap OK.

The warning icon  is removed from the status bar. And it is also removed from the Warning field.

Tip: You can also swipe left or right to temporarily remove the warning icon via Notification Center.

Rebooting your phone

The improper operation may cause malfunction. If the malfunction occurs, your system administrator may ask you to reboot your phone.

Procedure

1. Do one of the following to enter the control center:
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Basic Settings > Reboot > Reboot.
The phone prompts you to reboot the phone or not.
3. Select OK.

Tip: You can also long press the * key on the keypad when the phone is idle to reboot the phone.

Resetting to factory settings

When some issues occur on your phone and you have tried all troubleshooting suggestions but still do not solve the problem, you can reset your phone to factory configurations.

This operation will delete all your personal configuration settings, and reset all settings to the factory defaults.

Check with your system administrator if the personalized settings are kept before resetting your phone to factory settings.

Procedure

1. Do one of the following to enter the control center.
Swipe down from the top of the screen.
Tap More.
2. Go to Settings > Advanced Settings (default password: @N3talk2@2*) > Reset Config.
3. Select RESET TO FACTORY SETTINGS.
The phone prompts you to reset the setting or not.
4. Select OK.
The phone begins resetting.

Tip: You can also long press the Redial key when the phone is idle.

After reset, the screen prompts "Welcome Initializing...Please wait". The phone will be reset successfully after startup.

Note: Reset of your phone may take a few minutes. Do not power off until the phone has started up successfully.

Updating the phone configuration

Your system administrator may ask you to update the configuration for your phone to apply any changes to system settings, which you can do without restarting it.

Procedure

- 1 Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap More.
- 2 Go to Settings > Basic Settings > Update Configuration.
- 3 Enter the provision information in the corresponding field.
- 4 Save the change.
 - The phone prompts you whether to provision now.
- 5 Select OK.

Clearing User's personalized configuration settings

You can clear the personalized configuration settings manually on the phone.

Before you begin

Your system administrator has enabled the phone to keep the user's personalized settings after auto provisioning.

Procedure

- 1 Do one of the following to enter the control center:
 - Swipe down from the top of the screen.
 - Tap More.
- 2 Go to Settings > Basic Settings > Reset Local Config > Reset local settings.
 - The phone prompts you to reset the local settings or not.
- 3 Select OK

Notices

The specifications and information regarding the products in this guide are subject to change without notice. All statements, information and recommendations in this guide are believed to be accurate and presented without warranty of any kind, express or implied. Users must take full responsibility for their application of products.

Technical support

For additional support information please visit the One Talk support site (verizonwireless.com/support/one-talk/) for the latest guides, FAQs, product documents and more.

Important customer information

To avoid electric shock, use caution when connecting cables. For example, do not connect safety extra-low voltage (SELV) circuits to telephone-network voltage (TNV) circuits. LAN ports contain SELV circuits, and WAN ports contain TNV circuits.

Some LAN and WAN ports both use RJ-45 connectors.

To avoid electric shock, do not operate the product or connect or disconnect cables during electrical storms. To avoid electric shock, do not use this product in or near water.

To reduce the risk of fire or overheating, keep this product in well-ventilated areas, away from radiators or other heat sources. Do not block cooling vents.

The plug-socket combination must be accessible at all times because it serves as the main power-disconnecting device.

Use only the manufacturer-provided AC adaptor approved for use with this product. Use of another AC adaptor may cause a fire or explosion.

This product relies on short-circuit (overcurrent) protection installed in your home or office. Ensure that a fuse or circuit breaker no larger than 120 VAC, 15 A U.S. is used on the phase conductors (all current carrying conductors).

Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

1. When the power cord or plug is damaged or frayed
2. If liquid has been spilled into the product
3. If the product has been exposed to rain or water
4. If the product does not operate normally when the operating instructions are followed. Adjust only those controls that are covered by the operating instructions, since improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal condition

WEEE warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of waste electrical and electronic equipment (WEEE) as unsorted municipal waste and collect such WEEE separately.

Disclaimer

The specifications and information regarding the products in this guide are subject to change without notice. All statements, information, and recommendations in this guide are believed to be accurate and presented without warranty of any kind, express or implied. Users must take full responsibility for their application of products.

Yealink Network Technology CO., LTD., makes no warranty of any kind with regard to this guide, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. Yealink Network Technology CO., LTD., shall not be liable for errors contained herein nor for incidental or consequential damages in connection with the furnishing, performance, or use of this guide.

Important 911 emergency response information

If you call 911, emergency service responders will be sent to the registered location you provided when you provisioned this phone. An incorrect address could result in incorrect routing of 911 calls and dispatch of emergency personnel to the wrong location, so please contact your administrator if your registered location is not accurate.

Once a 911 call is placed, the device will enter for a period of five minutes Emergency call back mode and on the LCD screen of the device the message displayed will say **“Emergency Call Activated: features restored after 5 minutes”**. What this means is that for a period of five minutes all of the advanced One Talk calling features will not work to allow the 911 operator to contact the number placing the 911 call during those five minutes. Once the five minutes have passed, the phone will resume normal operation.

Data and voice functionality (including the ability to make and receive 911 calls) will not be available during a power outage, broadband connection failure or other service disruption. Neither Verizon Wireless nor any of its affiliates shall be liable for any service outage and/or inability to access emergency service personnel, nor shall Verizon Wireless or any of its affiliates be responsible for the acts or omissions of emergency response center personnel.

Declaration of conformity

Hereby, Yealink Network Technology CO., LTD., declares that this phone is in conformity with the essential of the Federal Communications Commission (FCC). You can find FCC information from the label on the back of the phone.

Part 15 FCC Rules

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device is compliant with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference
2. This device must accept any interference received, including interference that may cause undesired operation.

Class B digital device or peripheral

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna
2. Increase the separation between the equipment and receiver
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
4. Consult the dealer or an experienced radio/TV technician for help

Important safety precautions

Please read the following important safety notices and instructions before installing or using the product.

A DANGER warning refers to situations that could cause bodily injury

A CAUTION warning refers to situations that could result in equipment malfunction or damage

1. Follow all warnings and instructions marked on the product
2. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use an antistatic cleaning pad for cleaning
3. Do not use this product near water
4. Do not place this product on an unstable cart, stand or table. If the product falls, it could be seriously damaged

5. This product should be operated using the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company
6. Do not allow anything to rest on the power cord. Do not locate this product where people will walk on the cord
7. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock
8. Never spill liquid of any kind into or onto the product
9. Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks
10. Refer all questions regarding servicing of this product to qualified service personnel

Danger—electric shock and fire

Electric current from power, telephone and communication cables is hazardous and could result in electric shock and/or fire.
