

# Basic Voicemail User Guide (2024)

- NOTES:
1. Not all options are available with every mailbox type
  2. When you press 7 from the main menu to transfer to the old system you will be required to enter your mailbox number and old passcode. To return to the new system, you will have to hang up and redial your access number.
  3. If you are using individual sub-mailboxes and call to retrieve messages, the system will ask for your mailbox identifier, which is the sub-mailbox number (1-8). The main mailbox identifier is 0.
