A Fios Network Adapter can be placed anywhere in your home near a coax outlet where an ethernet connection is needed.

- A. Verify the router in your home is connected to a coax outlet.
- B. Connect an ethernet cable from any yellow LAN port on Fios Network Adapter to an ethernet port on your device.
- C. Connect a coax cable from the Fios Network Adapter to a coax outlet.
- D. Connect the power cord to the Fios Network Adapter.
- E. Setup is complete when power and coax lights turn green.
