

Wi-Fi Extender Mini

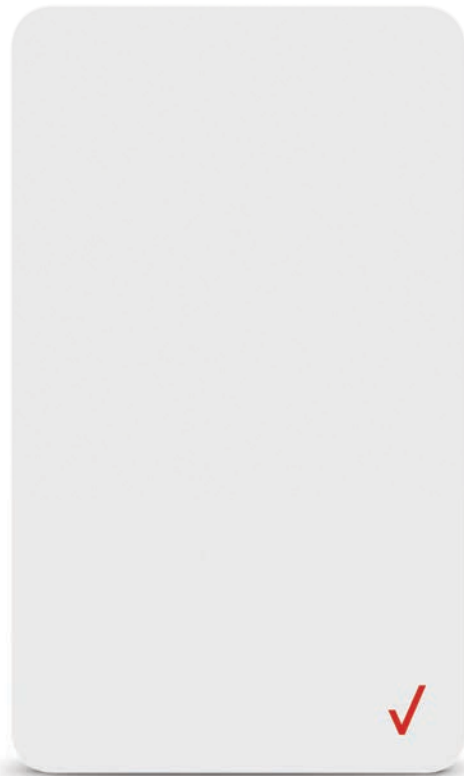

Model: CME1000

Product description

The Wi-Fi Extender Mini is an 802.11ax Wi-Fi extender that supports the latest Wi-Fi technology. It offers seamless roaming, band steering, and Self-Organizing Networks (SON) technology. Wi-Fi Extender Mini is the first mini extender in the market that supports 2.4GHz, 5GHz and 6GHz (Wi-Fi 6E). The wall mounted design enables you to have an easy plug and connect experience to extend the seamless connectivity in your home.

Key features

- IEEE 802.11ax Tri-band
- Support OFDMA/MU-MIMO
- Wall mounted type design
- Plug and connected (WPS button)
- Embedded power supply

Hardware features

- Qualcomm IPQ6010, Wi Fi 6E
- IEEE 802.11a/b/g/n/ac/ax
- Tri-band 2.4GHz/5 GHz/6GHz
- DDR4 2GB RAM
- eMMC 4GB Flash
- 1 x WPS button
- 1 x Reset button
- 1 x Front LED(R/G/B/W/Y) to indicate system

Technical specifications

Item	Specifications
Connectivity	Wi-Fi 802 11ax MU-MIMO
Wi-Fi frequency bands	2.4GHz, 5GHz, 6GHz
Plug type	3-pin AC Plug (Wall mount type)
Power	Input range: 100~240VAC, 50/60Hz DC Input: 12V1.5A
LEDs	R/G/B/W/Y to indicate system status
Operating temperature	0~40°C
Storage temperature	20°C~80°C
Certificates	FCC, UL, Wi-Fi Alliance
Dimensions	3.39 x 5.71 x 2.10 Inch
Weight	0.75 lb
