

High quality component audio / video cables improve picture quality when compared to ordinary “out of the box” cables. These low-loss, 75 -ohm impedance cables improve picture quality and performance. Due to the unique fanout design, these cables are excellent for connecting in congested areas where enhanced flexibility is desired. Connector boots are uniquely coded white for audio and black for video. Additionally, each has a color band and molded-in label to assure accurate connections.

Mini Cable High Definition
TV Audio/Video 5-Component

Features:

- Fanout connector on both ends or with flexible leads for easy installation for audio and video high definition signals
- Allows tighter bend radii for limited space application
- Fully molded features on both the connectors and break out for excellent strain relief
- High level of shielding to protect against RF and electromagnetic interferences
- 28 AWG copper conductors and Gold plated RCA connectors for better performance

Specifications

Stranded Copper Conductors 28 AWG
95% Shielding
75-ohm impedance
PVC Jacketed
ABS molded connectors w/ gold-plated RCA style connectors
Outer Jacket: 9mm
Individual Color Coded Jackets

Part Number	Description	Length
ASB4800-6	HDTV Mini Cable 5-Component 6FT	6 Feet
ASB4800-12	HDTV Mini Cable 5-Component 12FT	12 Feet
